PREFACE

THIS book will not appeal to a large public ; it is, I fear, totally lacking in all the attractions of a popular novel. Primarily it will interest the philologist, if anyone, but while recognizing this, I should like to recommend it to the still more limited class of those who may in the course of practical life come into contact with one or other of the dialects it deals with.

On the uses of a knowledge of dialects I am not going to enlarge. The advantages that are gained by treating with a man in his mother tongue are recognized by everyone with experience, and dialects from one point of view are only incompletely differentiated languages. Dialects, in many ways a bane to the practical worker, have, however, the merit that they are *not* actually distinct languages and that they can be studied in their relation to the standard languages of which they are variants, and, in fact, a knowledge of them is most easily thus acquired.

In the present instances the differences between the dialect and standard Persian are mainly phonetical and morphological. Certain sounds in the one are more or less regularly represented by certain other sounds in the other. These substitutions can be predicted almost with certainty and their recurrence can be represented as the result of " laws ", the " Sound Laws " of philology. The morphological variations are in many cases the outcome of the operation of these " laws " of sound change on the inflectional endings of words, or otherwise they consist of the interchange of elements of different origin but analogous function.

All these differences can be most easily learned by comparing the dialect with the standard language, deducing the rules to which the changes of sound conform, and noting the actual replacement of one element by another one. This com-

parison has been carried out in the present book in regard to the three dialects dealt with, and anyone who may want to acquire a working knowledge of them will find that it will set him well on his way and save him the labour of collating for himself a mass of miscellaneous detail.

He will find that χt in standard Persian appears in Bakhtiari as δ or d , and ft as \bar{d} or δ , to quote only two striking examples.

The morphology of Bakhtiari has not been set out in the present work, having been left till a more convenient season, but that does not detract from the helpfulness of what has been done, though it leaves it lacking a desirable supplement.

The non-professional student who may have merely the ordinary base motives of everyday life for wanting to know a dialect, the class whom I am attempting to capture at the moment, will find beside each dialect word its relative, where such exists, in standard Persian, and it is not in the least incumbent on him to follow me in tracing both back to an earlier form in which each may be believed to have had its origin.

Besides the main differences of phonetics and form, dialects probably always display some difference in vocabulary from the standard tongue. The present work is too small to contain anything like complete vocabularies of the three dialects, but it may be claimed that the vocabularies given include, especially in the case of Bakhtiari, the commonest and most important words in daily use.

So much for the attractions which this book presents to the scholar-*malgré-lui*.

It would be futile for an amateur to attempt to beguile the trained acumen of the professional philologist. He must be left to judge for himself of the merits and demerits of the work. I can only tender it to him with a "recommendation to mercy" and a request to search his own past record if he has occasion to fall foul of misprints.

By the time it appears the bulk of this book will probably have been four years in the Press, and the rest of it three, and

its proofs have intermittently at long intervals followed me in a roving life half round the world. It has not always been possible for me to refer to my original notes, and I think that even specialist authors do not reckon to keep technical detail fresh in their minds for a period of years.

I have to thank the Royal Asiatic Society and the India Office for making the publication of this book possible. The former by including it in their list of Prize Publications and the latter by undertaking to buy 100 copies of it. It was believed that the Bakhtiari portion might have been useful to British officers who were concerned with affairs in the South-West of Persia during the war. But the Press has proved more than a match for the war in avoiding a conclusion.

I have once been rash in promising — or threatening — a “sequel”, and I do not wish to repeat the mistake. I may, however, say that I have further Bakhtiari material of a more interesting nature than that included here. This comprises popular tales of all descriptions and popular poetry, an extensive vocabulary, and abundant material for a treatise on the morphology, the omission of which here will doubtless be a source of grief to my many readers, professional and non-professional.

I. THE BAKHTIARI DIALECT

INTRODUCTION

THE Bakhtiāri tribes occupy the large tract of mountainous country in South Persia, lying roughly between longitudes $48^{\circ} 40'$ and 51° E., bounded on the south by the plains of Rāmuz, Shūshtar, and Dizfūl, and on the north by the high-lying submontane districts of Chahār Maḥāl, Farēdan, and Khunsār.

From their mental and physical characteristics, and from their habits, there is every reason to believe that the Bakhtiāri are Iranians of the Iranians. This presumption is not belied by their language, and it is further strengthened by the nature and situation of their country, which consists of a series of lofty and rugged mountain ranges separating at once the Persian uplands from the low-lying plains of 'Arabistān, and the home and centre of the Persian race from the outskirts of the Arab diffusion. It seems more than probable that the Bakhtiāri of to-day are the modern representatives of a long series of ancestors who have occupied the same territories and followed a similar mode of life from a remote past.

The Bakhtiāri have for many generations been divided into two main groups of tribes known as the Haftlang and the Chahārlang. The hegemony of the whole now resides with the Haftlang, one of the sections of which provides the ruling family, whose members, under the title of the Bakhtiāri Khāns (Khawānin i Bakhtiāri), have, thanks to the part which they have in recent years played in Tehran politics, acquired a European celebrity and occasional exaltation in the columns of the *Times*.

Though thus figuring as Haftlang this family is said to have originated from a boy of the Pāpī tribe of Lurs, who was ejected by his fellow tribesmen and recalcitrant subjects, and strayed into the Bakhtiāri country from the west of Luristān.

Till the middle of last century the Chaharlang were the dominant tribal group, and it was only Ja'far Qulī Khān, the grandfather of the present Haftlang Khans, who succeeded in extending their sway and establishing the general ascendancy of the Haftlang.

The Chaharlang are now numerically inferior and confined principally to the south-east portion of the country, where they live a more or less sedentary life, and to its northern and western frontiers, where they are nomadic.

The large majority of the Haftlang are nomadic, and in the course of their seasonal migrations cover all the central part of the tribal territory.

In the winter they are found scattered among the low hills and undulating valleys fringing the 'Arabistān plains, but with the arrival of the Vernal Equinox they begin to turn their faces northwards and then gradually make their way to the lofty central ranges and the high-lying hill-girt plains beyond, which border on and shelve down to the central Iranian plateau.

Autumn, again, sees them retracing their arduous steps along unmade tracks over the intervening ranges to their winter haunts.

Though nomads, whose principal interests centre in their flocks and herds, they are not—like many of their cousins the Lur tribes of Luristān—a pastoral people of the strictest sect, for they also practise agriculture. Indeed, many tribes cultivate two sets of crops, sowing wheat, barley, and other cereals in the uplands (*yēlāq*) in autumn, which they reap on their return in the following summer, and again sowing wheat and barley

in the *garmsīr* (hot country) in winter, which some of their number remain behind to reap and harvest when the general exodus takes place in spring.

The ordinary tribesmen are destitute of any bookish education or knowledge of the outer world, though they may visit the neighbouring towns as foreigners for commerce or barter, but the exigencies of their active, roving life, ever confronting them with the unmitigated dangers of rugged mountains and swift rivers, and exposing them to the vicissitudes of climate and weather, keep their wits in a state of intelligent activity.

Pastoral peoples are not usually fools, as the humble necessary cultivator often is, and the nomad grazier should be a combination of Rob Roy and the Lowland Scottish shepherd. The Bakhtiārī has more of Rob Roy perhaps than of the shepherd in him, and his natural pastimes, when left to pursue his own courses, are rather raiding and robbery than poetic reflection or philosophic meditation.

Considering his surroundings and his neighbours, it is not altogether surprising if the Bakhtiārī is a man of violence and not unacquainted with sin. If under the discipline of relatively powerful chiefs his quick temper may find satisfaction in belabouring a quarrelsome or sulky wife or hurling himself on an annoying brother Bakhtiārī, rather than in the excitement and danger of an attack on a neighbouring tribe, and if petty thieving and pilfering often take the place of robbery under arms and other high emprise, it is by no means always so. At least, the manliness of the race has not as yet been assailed by the debasing influences of law courts with their chicane and false swearing to another's hurt, practices in which, I have no doubt, the Bakhtiārī tribesman would soon prove an adept if opportunity presented itself.

The Bakhtiārī, whose ruling vice in his own humble

sphere is that of all Persians—greed of money and of possession—does not merely envy and grieve at the good of his neighbour; he tries to transfer it to himself.

I am, however, not here concerned with the Bakhtiāri's morals but with his language, and my object in adverting to his life and habits is to bring into prominence conditions which are calculated to affect the range and nature of his speech.

We have seen that the typical Bakhtiāri is a shepherd, cattle-owner, and nomad; we have seen that he is also an agriculturalist, that the country he inhabits is wild and savage, and that he is constantly exposed to the severities of nature, to heat and cold, to rain and snow, and parching dryness. All these conditions postulate a vocabulary sufficiently variegated to deal with them, for they constitute the crude material of necessary conversation.

As to manner of speech, the Bakhtiāri is an out-of-door animal and a mountain-dweller, and is accustomed to exercising his lungs, if occasion require, across a valley or down a hillside. The less sophisticated tribesman is therefore apt to be a noisy companion in a drawing-room; on the other hand, he has, as a rule, the merit of articulating clearly.

Turning to external conditions, until recent years the greater part of the country was little traversed by outsiders. Now, the Lynch Road carries a varying stream of caravans accompanied by Shushtari, Dizfuli, Chaharmahali, and occasionally Arab muleteers or donkey- or camel-men. But this traffic is restricted to the line of the road, and the districts and tribes lying off the road are little visited. On the other hand, there is considerable commerce with towns such as Shushtar, Dizful, Ramuz, and Ispahān, where the tribesmen take the products of their flocks and herds for sale, purchasing in their stead the more artificial necessities of life, such as matches, sugar, piece-goods, and cotton textiles of all sorts, which

furnish the principal material of their clothing, and all iron implements, such as spades, ploughshares, bits, and stirrups, as well as copper cooking pots.

Further, the Bakhtiārī have some relations, frequently hostile, with their tribal neighbours. On the west these are the Lurs, in particular the Dīrakwand and Sagwand, and on the south-east the Kūhgalū, all like themselves of Iranian stock and speaking dialects not widely differing from Bakhtiārī. On the north they have the Iranian village population of Chaharmahal and Farēdan. On the east, however, their neighbours are the Turkī tribe of the Qashgāi, and all along their southern border, only interrupted by the three towns mentioned above and a few villages, roam the Arab tribes of 'Arabistān. One small community of Arab origin even lives among and counts as a part of the Bakhtiārī. These are the 'Arab Gāmēsh, who, as their name implies, make their livelihood by keeping herds of buffaloes. The buffalo has no place among the stock of the true Bakhtiārī nomad.

Thus, the permanent external influences which may be expected to modify the Bakhtiārī tongue are: (1) the Persian dialects of the towns, (2) the Lur and Kūhgalū dialects, also Persiau, and (3) the Turkī and Arab dialects, which are totally alien.

There is, however, a further fluctuating source of influences affecting the mental horizon and language of the tribes regarding which a few words are necessary. I cannot say exactly when the Bakhtiārī Khāns first began to visit the Persian capital, but it is certainly not less than twenty or thirty years since the Sardar Asad (Hājji 'Ali Qulī Khān) first began to frequent Tehrān, and at any rate ten or twelve years ago several of the Khāns of the rival families of cousins spent some time in the capital. The primary object of each visitor was to gain the ear of the Persian ministers and secure for the family of which he was a member the coveted posts of

Īlkhānī and Īlbēgī—officials who are appointed by the Central Government and recognized by them as the responsible heads of the tribe.

One chief, Luṭf 'Alī Khān, now the Amīr Mufakhkham, served for many years with the then heir to the throne, Muḥammad 'Alī Mirzā, as Commander of his body-guard in Tabriz. Later, the part that several of the Khāns and their followers played in the struggle between the "Constitutional" party and Muhammad 'Alī, now become Shah, and how they ousted the latter and provided Persia with a Prime Minister and Cabinet, is public knowledge. Under this régime or that which succeeded it Bakhtiāris also held several Provincial Governorships, e.g. those of Ispahān, Yezd, and Kermān.

The result of all this is that not only all the chief Khāns, but also hundreds of their followers, have in recent years spent long periods in Tehrān and the North, as well as in several other of the principal cities of Persia, and their outlook has been proportionately extended. In the case of the uneducated this means an increased familiarity with ordinary Persian and an enlarged vocabulary. Nor have these been the only acquisitions; Bakhtiāri sowars now smoke cigarettes instead of only the *qaliān*, and a respectable number of them have become addicted to opium.

Another effect of these sojournings abroad is to make it more difficult to say when and from what source foreign elements have been adopted into the language. Arabic and Turkī words may have been acquired at first hand from the Arabs and Qashgai, or they may have been picked up through the medium of ordinary Persian in Tehrān.

All better-class Bakhtiāris talk ordinary Persian with ease and fluency, if not with a Tehrān intonation or preciousness, and are ready to water down their own dialect with it. Anyone who learns to read and write does so

in ordinary Persian, for Bakhtiārī has no literature and is seldom or never written.

The returned Vikings narrated their adventures in foreign lands and on foreign seas to their home-folk, and in the same way the Bakhtiārī at his home-coming doubtless describes the joys of the capital and the part his chiefs and he have played in national politics; and this cannot be done entirely in the restricted vocabulary of the nomad or the cultivator.

Bakhtiārī wanderings have not of late been confined to the soil of Persia. Several of the older Khāns have paid visits to Paris and London, and more than one Khān's son has been, or is being, educated in Swiss or English schools. We need not, however, expect to find the Bakhtiārī backwoodsman talking a Frenchified or Anglified form of his mother tongue. The effect is rather to alienate the Bakhtiārī chief's son from the tribesman than to draw the tribesman into the vortex of European civilization.

Our general conclusion may be that, like all languages that are not dead or moribund, the Bakhtiārī language is growing and incorporating extra-tribal elements, and the range of vision of the tribesmen is becoming extended beyond the geographical limits of their habitat, and that this process is likely to continue until the dialect gradually approximates, both in vocabulary and grammatical forms, more and more closely to a universal form of Persian.

It will, however, be many a long day before the names of the concrete objects of everyday life are ousted, or characteristic forms of inflection give way to those of ordinary Persian. Such matters rest with the mothers of the tribe, who do not travel beyond the shadows of their own eternal hills.

The Bakhtiārī have for many years attracted an increasing amount of attention on the part of Europeans. They were known, indeed, from references to them in Persian history, but as a modern and extant people they

were discovered for the outside world by Sir A. H. Layard, who lived among them on a familiar footing for some time in the years 1840-2, when the power of the Chaharlang chiefs, though tottering to its fall, was still dominant.

Another traveller, De Bode, Secretary of the Russian Legation at Tehran, also visited the country in 1840-1. Permanent relations between the Bakhtiāri and the British were, however, inaugurated only by the visit of Major H. A. Sawyer to their country in 1890, where Mrs. Bishop's wanderings also took her at the same time. Shortly before this, in 1889-90, Lord Curzon had travelled through Bakhtiāri-land, and the best account of the tribe is still to be sought in the pages of his masterly work, *Persia and the Persian Question*.

In all these years, however, little attention was paid to the Bakhtiāri dialect. I write beyond the reach of libraries and divorced from many of my own books, and I cannot speak with certainty, but I believe that a few Bakhtiāri words are given by Layard in JRGS., vol. xvi, and by Houtum Schindler in ZDMG., vol. xxxviii (1884), pp. 43-116, but neither of these articles have I been able to examine.

The only systematic study of the dialect would appear to be that contained in Oskar Mann's *Die Mundarten der Lur Stämme im südwestlichen Persien*, Berlin, Georg Reimer, 1910. Mann gives fifteen or sixteen pages of specimens of prose and poetry with translations in German, prefaced by a few general remarks on the various Lur dialects, including Bakhtiāri, and followed by a short combined vocabulary. The results of Mann's researches are useful as far as they go, but they are by no means free from error.¹

¹ In his translations he twice renders Bχ. *īśā* (*īśā*) as "you", pl. German "Sie", but in his vocabulary he deliberately equates it in meaning with Mn.P. *īśān*, "they", German "sie", and on p. xxviii he again renders it by Mn.P. *īśān*.

I have, in recent years, devoted considerable study to the dialect, and have collected large quantities of popular poetry and prose tales. These I have written down from the mouths of several Bakhtiārī of the upper, or at least of the more intelligent classes, belonging to some of the principal sections of the Haftlang,¹ whose language represents what may, I believe, be considered the standard speech of the tribe.

In the circumstances in which the Bakhtiārīs live dialectal differences of vocabulary and pronunciation may be postulated and do in fact exist, but to ascertain and classify all the variants would require more minute and extended research than it has been possible for me to undertake. The material at my disposal is, however, fairly comprehensive and representative, and it should be adequate for my present purpose, which is to deduce a general outline of the phonology of the language.

There is naturally considerable latitude in the pronunciation, especially of vowels. That is a phenomenon from which no spoken language is exempt, and it is of course particularly marked where the steadying or petrifying effect of a script is absent.

I have chosen Modern Persian (Mn.P.) as the immediate basis of comparison, because that comparison is more useful than any other from the point of view of a person anxious to learn the language for practical purposes. The philologist can either already equate the Mn.P. forms with those of Old Persian and Avestic, or he can find plenty of assistance in doing so elsewhere. I have, however, in general, given brief indications of the older sounds which are represented.

I have provided a tolerably representative collection of words to illustrate the various sound developments, and additional examples of the initial sounds will be found in

¹ e.g. Zarāswand, Bédārwand, Dūrakī.

the vocabulary at the end of the article under the letter concerned, along with all the words cited in the text.

It is impossible for me here to deal with questions of morphology, but the differences between Bakhtiārī and Ordinary Colloquial Persian (O.C.P.), though noticeable, are not profound. The following points may be mentioned :—

The plurals of animate objects are usually formed by the addition of the suffixes *-ān* (Mn.P. *-ān*) and *-gēl, -yēl*.

A suffix *-ke* is sometimes used with demonstrative force : *pā.ā-ke*, "the man."

The termination of the 3rd sg. of the present tense of verbs is *-ē* or *-a* ; that of the 2nd pl. is *-īn*, and of the 3rd pl. *-an, en*.

The perfect tense is obtained by the addition of *ē* to the forms of the preterite : *avēdum*, "I came" ; *avēdumē*, "I have come."

The Mn.P. verbal prefix *mī-* is replaced by *i-*.

The verb *šudan*, "to become," is not found, and its place is taken by *wo i bīdan*.

The forms *bāšam*, etc., are not found, and are replaced by the subjunctive of *bīdan*.

The construction with the past tenses of transitive verbs is the same as in Mn.P.

NOTES

1. A vertical line above a letter indicates the stress accent.

2. The sign || between two forms indicates that both forms are in use and have been recorded.

3. A question mark *before* a word or statement indicates doubt whether the word really illustrates the principle of which it is given in illustration, or whether the statement is just.

4. A question mark *after* a Bχ. word indicates doubt as to the existence or correctness of the form; after an English word or Mn.P. word doubt whether it correctly

represents the meaning, or if a Persian word, whether it corresponds to the B_X.

Following the usual practice I have quoted Sanskrit roots and forms in their "un-gunated" forms. Following Bartholomae I have given Avestic roots in their "gunated" forms.

Thus: Skr. $\sqrt{bh\bar{u}}$ -, Av. \sqrt{bav} -.

The sign : after an infinitive serves to introduce the present-base *dīdan* : *bīn*.

PHONOLOGY

BAKHTIĀRĪ SOUNDS

ASPIRATION

h

Of the simple vowels given above some tend to become diphthongal, thus :

 $\bar{a}a$ $\check{a}a$ \hat{a}^a $\bar{e}i$ $\check{e}i$ $\bar{o}u$ \check{o}^a

There are also :

 $aw\bar{u}$ $ai'i$

where the last element appears to have developed out of the preceding one and not to be original.

Value of the Symbols

2. \bar{a} is as in "father".

\check{a} is the corresponding short. It has not been considered necessary to give it a special sign, as it occurs only in conjunction with h (ah -, $-ah$ -, $-ah$) in the diphthongal a^a , and finally or independently. The value of ah seems also to approximate to \bar{a} and \hat{a} , but the h is often slightly pronounced and the vowel short. Examples :

 $tahl$

bitter

 $b\bar{a}r$ ($bahr$)

share.

\check{a} is used to mean \bar{a} or \check{a} .

3. \hat{a} is the sound of *awe*, *autumn* :

 $d\hat{a}$ mother (*jackdaw*).

\hat{a} is etymologically only a variant of \bar{a} . Some persons affect the one sound and some the

other, and the same man will sometimes use them indifferently in pronouncing the same word. From the extremes the sounds vary inwards, and it is sometimes difficult to know which sign to employ. The variation goes still further, and the sound changes to *ō*, *ǒ* on the one side and occasionally to *a* *à* on the other. Thus: *wa*, *wā*, *wā̃*, *wō*, *wo*; *avēd* (not *āvēd*, probably owing to the accent falling on the second syllable), *ōvēd*, *ovēd*, *uvē-id*.

4. *a* is the ordinary vowel represented by the *fataḥ* of the Arabic script, resembling the *u* of "cut", but I think more open.
5. *à* represents a sound approximating to the *a* of "cat": (1) it is commonest in *ah* following a palatalized guttural as an alternative to the *ā* sound; (2) it also occurs before consonantal combinations beginning with *š*; and (3) it occasionally occurs as a variant of *ā* before *n*:

<i>kàh</i> (<i>kah</i>)	chopped straw.
<i>wārgàh</i> (<i>wārgāh</i>)	camping-ground.
<i>àšnīdan</i>	to hear.
<i>imānī</i> (<i>imānī</i>)	thou remainest.
<i>māndan</i> , <i>mandan</i> ,	
<i>māndan</i>	to remain.

6. *ē*, French *é* as in "détente"; Scots "day" (I take "dare" to be rather *dē^r*). It is frequently followed by an *i* sound: *ēⁱ*, *ēⁱ*.

<i>avēd</i>	he came.
<i>rēⁱδ</i>	he scattered.

In some words *ē*, *ēⁱ* may be replaced by *ai*, e.g. *avēd*, *avaid*.

7. *è* is an open *è* approximating to the *e* of "let" and "men". It occurs occasionally before *n*
- | | |
|--------------|-----------|
| <i>ivēnī</i> | he throws |
|--------------|-----------|

but most frequently finally when it is difficult to discriminate from \bar{e} , with which it seems to interchange.

8. e is the sound of e in "water".
9. \bar{i} is the i of the French "dites". The nearest English is the sound of ee , ea , as in "reed" and "bead", which, however, is said by Jespersen to be always diphthongal, but in "seat", for instance, it does not seem to me to be markedly so.
 i is the i in English "bit".
10. \bar{u} is the ou in the French "jour", oo in "boot".
 u is the u of the English "put", "pull".
11. \bar{o} is the o of the French "chose". It tends to become diphthongal ou , o^u , like the \bar{o} of English, as in "so" (= *sou*), "close" (= *klous*).
 o is usually the o of the English "hop", "stock". Finally, and before h , it is the short of \bar{o} , the vowel sound in the French "peau", "faux".
12. au is the ou in the English "sound".
 ai is the vowel sound in English "died" (I should write Engl. "die" da^i).
 ei , is $\bar{e}i$, or ui . It is the sound I personally say in "tight" (*teit*), "tide" (*teid*), as opposed to the ai in "tied" (*taid*).
 oi as in the English "noise" (Engl. "boy" I should write boi^i). It commonly appears for \bar{a} before \bar{e} , y , etc.:

$j\bar{a}\bar{e}$	$jo\bar{i}\bar{e}$
Mn.P. $b\bar{v}\bar{a}yad$	$b\bar{e}-oi-h-\bar{e}$
$\chi ud\bar{a}ya$	$\chi udoiya$.

Gutturals

13. q is the velar sound represented in the Arabic script by ق.

k } are often markedly palatal and develop a palatal
 g } glide, as in :

$k'am$ = *kam*.

$hâ'ik$ = $\chi\bar{a}k$.

$gyerdin$ = *gardan*.

$gyau$ || *gau*.

In such cases they should, I think, be classed as Palatals.

χ } are the voiceless and voiced guttural spirants
 γ } represented in the Arabic script by ح and ج .

Palatals

14. č } are *tš* and *dž* respectively as in English "church"
 j } (*čerč*) and "judge" (*jač*).

These sounds are therefore compounds: dental + palatal.

y initial is as in English; *yū* as English "yew".
 Medially it occurs only as a glide, is less of a spirant, and varies in force down to vanishing point.

Dentals

15. t } are, I think, post-dental.
 d }

δ is the voiced inter-dental spirant, the *th* in the English "this", "breathe".

θ I have only recorded once and it may be disregarded (it would be the voiceless inter-dental spirant, the *th* in the English "think", "death").

Labials

16. p }
 b } call for no remark.
 f }

v } The sounds I represent by these symbols are
 w } troublesome. Neither of them in its English value exactly represents the $B\chi$ sound, which

itself varies. I think the average sound is what Jespersen represents by v , and Germanic philologists by "barred b ", \acute{b} , which is an unrounded bilabial spirant, the u in the German "Qual", "Quelle". When final and preceded by \acute{a} the sound is, as a rule, definitely labiodental, v .

Sibilants

17. s } I am unable to offer any exact information about
 z } the nature of the B χ . s and z , or of \acute{s} and \acute{z} .
 \acute{s} } They seem to me not to differ perceptibly
 \acute{z} } from the sibilants in the English "sit",
 "freeze"; "shut," "pleasure," and therefore
 the two first are, I suppose, alveolar, and the
 two latter palatal.

Nasals

18. v The nasal immediately preceding g is always guttural, and I have not thought it necessary to mark it specially. Where the combination is *in pausā*, or is followed by a consonant, the g is silent.
 B χ . *tang*, pronounce *tarv*, like English "tongue".
 When a vowel follows the g is pronounced: *tangumē*, pronounce *tarvgumē*, i.e. *tarv-gum-ē*, *sarnger*, etc.
19. \tilde{n} The sign \tilde{n} I have used to represent a nasalization which attaches itself to the preceding vowel. It would probably be more correct in some cases merely to mark the vowel as nasalized and in others to mark the vowel as nasalized and add an n , i.e. *hō̃-a*, *hō̃ⁿa*, instead of *hō̃nā*, as I have sometimes done. I think, however, that there is often something more than a mere nasalization of the vowel, and as the

pronunciation varies between the extremes of simple vowel nasalization and a full dental *n*, this intermediate stage seems not improbable. As, however, I adopted the use of the sign \tilde{n} for this sound many years ago when first writing down Bakhtiāri, and have ever since continued to employ it from various considerations of convenience, it is possible that my phonetical appreciation has been prejudiced by my eye.

Liquids

20. About *m*, *r*, *l* I have no remarks to offer. They do not seem to differ noticeably from the corresponding English sounds, except that the *r* is always sounded and is not only a graphic survival as frequently in English (water = *wātā*, etc.).

Aspiration

- 20a. *h* is as in English. Its position varies with the accompanying vowel. In *hār* it is further back than in *hīn*.

21. In the transliteration of Mn.P.:—

- (a) I have shown the classical \bar{e} and \bar{o} sounds as \bar{i} and \bar{u} , as they are now in most cases pronounced, except where it was desirable to distinguish between what were \bar{e} and \bar{o} and \bar{i} and \bar{u} respectively in classical Persian.
- (b) Written \bar{a} I have shown as \bar{a} , but it is to be remembered that at the present day it usually sounds more as a short \hat{a} or *o* (φ) and frequently before *n* as \bar{u} .
- (c) *a* is usually a somewhat drawled sound which I am unable to describe phonetically. It is not the English *a* in "cat" as Englishmen

- frequently like to make it, desiring to recognize a familiar friend. Often *a* is pronounced as *e*.
- (d) Written *ai* and *au* I have represented by those groups, though their pronunciation nowadays more usually approaches \bar{e}^i and \bar{o}^u .
- (e) As in B χ , Mn.P. *q* tends to be pronounced as γ , and γ as *q*.
- (f) The *y*-glide boldly shown in most transliterations of Mn.P. is slight or imperceptible:
 $\chi\bar{i}\bar{a}r$ or $\chi\bar{i}^v\bar{a}r$, not $\chi\bar{i}y\bar{a}r$.
gūrba i qašangī, a handsome cat.
- (g) The *v/w* question also presents difficulties in Mn.P. The solution is to be sought in ♣.
- (h) I have omitted *-h* where it has no etymological value.

POSTSCRIPT

Since writing the above notes I have happily "discovered" the textbooks issued under the auspices of the International Phonetic Association, and have been able to acquaint myself to some extent with the principles and doctrines of the Association.

In particular I owe a special debt for enlightenment to Daniel Jones's *Pronunciation of English*, Grant's *Pronunciation of English in Scotland*, and Noel-Armfield's *General Phonetics*, which appear to me wholly admirable.

This good opinion is, I believe, not *entirely* due to my having found in these works confirmation and support in many doubts and suspicions which I had come to entertain of expressed or implied phonetic assertions contained in ordinary books on language: *o* in "on" is not the short of *o* in "dote" (Scots) and so on, and Scots has a pure *e* and *o* corresponding to the French *é* and *o* (in *tôt*), etc.

Looking through what I have written above I would now tentatively establish the following equations with symbols employed by the I.P.A.:

$\bar{a}, \check{a} = a:$ and a	$\hat{a} = \text{q}; \text{q}$ (Scots)	$a = \text{A}$
$\grave{a} = \text{æ}$ or a (Scots)	$\bar{e} = e;$ e (Scots)	$\hat{e} = \text{ε}; \text{ε}$
$e = \text{ə}$	$\bar{i} = i;$ i	$i = \text{I}$

Final \hat{e} and i sometimes = I (Scots).

$\bar{u} = u;$ u	$u = \text{U} (?)$	$-o = o$
$\bar{o} = o;$ o (Scots)	$o = \text{ɔ}; \text{ɔ}$	
$a\bar{i} = a\text{I}$ or $a\text{I} (?)$	$e\bar{i} = \text{əI}$	
$au = a\text{U}$ or $a\text{U} (?)$	$o\bar{i} = \text{ɔI}$	

Note.—A point to note is that my long signs really represent quality, and not length. I think that vowels are seldom fully long in B χ . except when in the final position, e.g. $p\hat{a} = p\text{q}$.

If this is so, a point of similarity is to be remarked between B χ . and Samnānī, *vide* § 3 of Arthur Christensen's "Le Dialecte de Samnān" in the *Mémoires de l'Académie Royale des Sciences et des Belles Lettres de Danemark*, 7^{me} série, Section des Lettres, t. ii, No. 4, 1915.

$q = \text{q}$	$k = k$	$k^i = c$
$g = g$	$gy, g^i = \text{J}$	
$\chi = \chi$	$\gamma = \text{Y}$	
$\ell = \text{ts}$	$j = d\check{z}$	$y = j$ (i , also sometimes ç ?)
$\delta = \text{ʃ}$		
$v = v$	v and w both probably tend to ʋ	
$\text{w} = \text{ŋ}$	r probably r and r	

I cannot venture to diagnose l , but I think it inclines to l^i rather than to l^u . As regards h see the *Pronunciation of English in Scotland*, § 124.

(4) Bχ. *ū* = Mn.P. *ā* before *n* and *m* (see also Bχ. *ō*)

This change is common in vulgar O.C.P., especially before *n*. In the educated speech a sound approximating to *o* (*ɔ*) and the short of *ā* is usual.

<i>aspūñ</i>	horses	(<i>aspān</i> O.P. <i>ā</i> obsol.) <i>asphā</i>
<i>ē^ārbūñ</i>	riding animals	(* <i>ēahārpā^ān</i>) O.P. <i>ā</i>

<i>rūñ</i>	thigh	<i>rān</i> Av. <i>ā</i>
<i>šūm</i>	evening meal	<i>šām</i> Av. <i>ā</i>
<i>šūn</i>	shoulder	<i>šāna</i>
<i>zūñwī</i>	knee	<i>zānū</i>

Cf. Av. *zānu-drājah-*, H. and Hü.,
but see Air. Wb. *sub voce*.

- (5) Final *-ān* is usually *-āñ*, sometimes *-ōñ* in B χ . ; medially *ōn* alternates with *ūñ*, and sometimes *ān* is found.

<i>dōñist</i>	he knew	<i>dānist</i>
<i>dūñist</i>		
<i>hōña</i> <i>hūna</i>	house	<i>χāna</i>

Note.—B χ . *igurūsum*, “I run away” (past base *gurōd-*), in Mn.P. *mīgurīzam*, which, however, in O.C.P. has the alternative past bases *gurīχt* and *gurōχt*.

30. u.

- (1) B χ . u = Mn.P. u

<i>gudan</i> ,	to say	<i>guftan</i>	O.P. $\sqrt{gub-}$
<i>gudan</i>

(4) Bχ. ũ ← -uh ← -ōh = Mn.P. -āh-; Bχ. -um = Mn.P. -aham, -iham

iχum	I want	mīχ ^v āham
iχuhum		

By the dropping of etymological *h* (-ih, -ah) or an *h*, *v*, or *y* glide, forms such as the following are obtained:

ibām ibūhum	}	corresponding to O.C.P.	}	(buwam)
idum				mīdaham
ijum				mījaham
igum igūhum				mīgūyam
inum				mīniham
irum irivum iruvum				mīrawam

Where an ā or ō is involved the Bχ. vowel is often ō:

iχōn	they wish	mīχ ^v āhand
iχōē	he wishes	mīχ ^v āhad

igōē || he says *mīgōyad*
igōhē || *igūhē*

31. *ō*.

The length of Bχ. *o* is so liable to variation that it is convenient to treat all forms of it together. There are three principal sounds represented by Bχ. *ō* and *o*, viz., Mn.P. *ō*, *ā*, *au*.

- (1) Bχ. *ō* = Mn.P. *ō* (O.C.P. *ū*) and *ū*; O.P. Av. *-ū-*, *-va-*, *-au-*, (*ao*)

<i>dō</i>	two	<i>dū, do</i>	Av. <i>dva-</i>

(4) Bχ. *ō^u* = Mn.P. *au*, *ōu*

jō^u || *joh* barley *jau*, *jō^u*
(*jev*, *jō*, H. 428)

pl. *jāhā*, *jahā* *jauhā*

(5) It is not clear to what original form is to be referred
Bχ. *mō* || *mā* = I. There is no nasalization to
represent the *n* of the Persian *man*, O.P. *manā*
(gen. sing.). Perhaps it descends from the enclitic
acc. form, which appears as *-mā* in both G. and
Y. Av.

DIPHTHONGS

32. *ai* and *ei*; *ay*-

(1) Bχ. *ai* = Mn.P. *ai*; O.P. *-ati-*, *adiy*; Av. *-aiti*, *-ada*

<i>ai!</i> <i>aē!</i>	oh! (voc.)	<i>ai!</i>	
<i>kai</i>	when?	<i>kai</i>	Av. <i>kaða</i>
<i>pai</i> <i>pei</i>	tendo Achilles	<i>pai</i>

<i>paiya</i>	fordable		
<i>bē peiya</i>	unfordable		
<i>mail</i>	liking	<i>mail</i>	Ar. (O.C.P. <i>mēl</i>)

(2) *ai* when peculiar to Bχ. has usually developed from
a, followed by *y*, which may represent Mn.P. *d* or
g (and *j*), or which may be a glide.

bainām || defamed *badnām*
bēnām

<i>mai'as</i>	bee	<i>magas</i> (fly)	
<i>mayas</i>			
<i>mailis</i>	assembly	<i>majlis</i>	Ar.
<i>saiyèl, sayèl</i>	dogs	<i>sag-hā</i>

<i>saina</i>	dog(s), acc.	<i>sag (hā)-rā</i>	
<i>maiya</i>	don't come		
<i>maiyārīn</i>	don't bring (pl.)		

These two last should, perhaps, be written *màya*, *màyārīn*.

(3) B χ . ai often alternates with \bar{e}^i , \bar{e} :

<i>avēd</i> <i>avaid</i>	he came
<i>avērd</i> <i>avaird</i>	he brought
<i>istēd</i> <i>istaid</i>	he took
<i>zē'dan</i> <i>zaidan</i>	to strike

(4) Other examples of ai in B χ . are:

<i>dain</i> <i>dēn</i>	obligation	? <i>dain</i>	Ar.
	(moral)		
<i>hai</i>	continually,	O.C.P. <i>hai</i>	
	always		
<i>lai</i>	<i>gīlīm</i> , woven rug		
<i>painīdan</i> :	to measure	? <i>paimūdan</i>	
<i>ipain</i> ← <i>*paimn-</i> ?			
<i>tai</i>	in the presence of, to		
<i>tai</i>	half of a donkey (etc.) -load.		

33. au.

(1) B χ . au appears to be always secondary, being derived in most cases from *ab*, *āb*, *av*, *af*(š); V. 46.2, 4, 5, and 47.8. In a few cases it corresponds directly to Ar. *au*.

<i>au</i>	water	<i>āb</i>	O.P. <i>āp-</i>
<i>aur</i>	cloud	<i>abr</i>	Av. <i>awra-</i>
<i>bē'au</i> <i>bī'ā</i>	come	<i>bē'ā</i>

<i>ēitaur</i>	how ?	<i>ēitaur</i>	Ar. <i>taur</i>
<i>daur e</i>	around (prep.)	<i>daur i</i>	Ar. <i>daur</i>

(2) Bχ. au resulting from Metathesis :

<i>haulā</i>	sweetmeats	<i>halwā</i>	Ar.
<i>saur</i>	sneeze	cf. <i>surfa</i> ?	Ar.
<i>šaulār</i>	trousers	<i>šalwār</i>	

(3) Other examples of Bχ. au are :

<i>āftau</i>	sunset (cf. <i>āftau derrahd</i> , sun set)
<i>derrau</i>	
<i>aurā.ī</i>	alarmed
<i>aurau</i>	water channel, (drain ?)
<i>daurī</i>	platter, tray
<i>girdaurī</i>	collecting one's things for
<i>girdawārī</i>	a journey
<i>haul</i>	outcry
<i>laudaga</i>	shivering
<i>naud i</i>	a matting bundle of dates
<i>χurmā</i>	

34. oi.

Bχ. oi is frequent as an alternative to *ā(h)*, before *ī, ē*;
also as an alternative to *-āy-*:

<i>bisoiyīn</i>	rub!	<i>bisā.īd</i>
<i>iyoi.ē</i> <i>iyōhē</i>	he comes	<i>mī.āyad</i>
<i>doiya</i>	oh mother!	(<i>dā</i> = mother)

<i>zōi.īd</i> <i>zō.īd</i>	she gave birth to	<i>zā.īd</i>

CONSONANTS

GUTTURALS

35. k.

(1) Bχ. **k** = Mn.P. **k**, O.P. **k**; suffixes in *-k* are a characteristic
in Phl.

Initial

<i>kandan</i>	to dig	<i>kandan</i>
<i>kerdan</i>	to do	<i>kardan</i>
<i>kī</i>	who?	<i>kī</i>
<i>kaftār</i>	hyena	<i>kaftār</i>

Medial and Final

<i>kauk</i>	hill-partridge	<i>kabk</i>
<i>pī.āke</i>	the man	
<i>pīlīštuk</i>	swallow	<i>pirīstuk</i>
<i>takūn</i>	shaking, knocking	<i>takān</i>
<i>yēkī</i>	the one	<i>yakī</i>

(2) **-k** is dropped in :

<i>yē, yè,</i>	one	<i>yak</i>	
<i>ya</i> <i>yek</i>			
<i>hu'im</i> <i>hukm</i>	order	<i>hukm</i>	Ar.

Perhaps also in :

<i>tainīdan</i>	to shake (a tree, etc.)	
	which may be <i>tak</i> (cf. <i>takān</i>) and <i>-nīdan</i>	
	caus. suffix → <i>*tagnīdan</i> → <i>*taynīdan</i>	

and possibly in :

<i>mainā</i>	a cloth worn by women on the head and neck
--------------	--

This form may be compared with G. *maknū* (*maqnū* ?) and *μαχνα̇, μαχνū* and Kn.P. *μαχνα̇*; cf. P.Ar. *migna'a* (St.). The *q* would readily pass into *γ* and possibly *χ*, and in Bχ. this *γ* might pass through *g* into *y*.

(3) **-k** is preserved in :

<i>dāk</i>	mother
(poetical) <i>dā</i>	
<i>pistūñak</i>	nipple of gun
<i>nuk, nu'k</i>	point of

(4) Bχ. **k** = Mn.P. *χ^v*

41. *j*.

(1) B_χ. *j* = Mn.P. *j*

Mn.P. *j* represents several sounds in O.P. and Av., the principal being *y-* and *č*. The development of *j* in B_χ. seems to follow exactly similar lines, and it is unnecessary to give many examples.

<i>gyāhīdā</i> <i>gīyōhīdah</i>	giving a person the	<i>gawāhī dih</i>
<i>dādan</i>	trace of stolen	
	property	

(6) In B χ . a y -sound after initial g and medial g (where it is preserved) is often optional, but in some words is more or less constant. It occurs especially before a , e , au , and i . I do not know it before $ā$ and only once before $ū$ (*tangyum*).

It appears to be simply a glide arising from the palatal nature of B χ . g . It frequently appears in a less decided form in which cases I have represented it as g^i . This i glide is also frequently heard after k .

Examples

<i>gyau</i>	brother
<i>gyap</i>	big
<i>gyer</i>	scald-headed ; cliff
but <i>gā</i>	cow, ox
<i>gūl zaidan</i>	to deceive, etc.

(7) In B χ . y frequently occurs as a glide between adjacent vowel sounds.

(10) The *y*-glide appearing in Mn.P. between a verbal base ending in a vowel and a termination beginning with one is often omitted in B χ . or replaced by *h*.

igum, igū.ē I say, he says *mī-gō-y-am,*

also <i>kuntāq</i>	stock of gun	<i>kundāq</i>	

Oskar Mann¹ usually gives the final consonant of the 3rd sg. pret. of a verb as *t*, e.g. *bīt*, *gut*, *giriht*, *kirt*, *oveit*. I do not agree with this; the final consonant should be *d* or *đ*. Thus, *bīd*, *bīđ*; *gud*, *guđ*; *kerd*; *oveđ*, etc., and only rarely *t*, e.g. *kašīt* || *kašīd*.

For Bχ. *ft*, *st*, *št*, *vide* §§ 47.4, 49.6, 50.5 respectively.

(3) **xt** may be altogether lost in B χ . as in

pō^en || *pō^udan* they cooked *puχtand*

On the other hand it is preserved unaltered in a large number of words in common use, e.g. :

<i>baχt</i>	fortune	<i>baχt</i>

(12) The disappearance of the $\delta = \chi t$ appears to be rare :

pō^uḍen || *po^en* they cooked *puχtand*

Examples of

ze'dan to strike *zadan*

without the ordinary *d* are rare.

d is also preserved in most Persian-Arabic Loan Words.

(3) Mn.P. medial **b** disappears in B_χ. :

<i>bī</i> <i>bē</i>	lady	<i>bībī</i>
<i>zōñ</i>	tongue	<i>zabān</i>

(4) Mn.P. final *-ab* appears in B χ . as *-au* :

<i>lau</i>	lip	<i>lab</i>	Phl. <i>lap</i>
<i>tau</i>	fever	<i>tab</i>	Av. \sqrt{tap} -
<i>šau</i>	night	<i>šab</i>	O.P. χ <i>šap</i> -

but the final *-ab* from Arabic roots becomes *-av* :

<i>talav</i> :		<i>ṭalab</i>	Ar.
<i>matlav</i>		<i>maṭlab</i>	Ar.

(5) Mn.P. *āb* initial, and sometimes final and medial, becomes B χ . *au* :

<i>au</i>	water	<i>āb</i>	O.P. <i>āp</i> -
and its compounds :			
<i>aurēz</i>	watercourse	<i>ābrīz</i>	
<i>aurū</i>	flowing stream	<i>*āb i rūd</i>	
<i>aušūr</i>	watercourse	<i>*ābšūr</i>	
<i>Sardau</i>	Proper name	<i>Sardāb</i>	
<i>bau</i> ,	father		Cf. Mn.P. <i>bāb</i> ; H. 147 ; Kurd. <i>bāb</i> , <i>bāv</i>
<i>biχaun</i>	make lie down	<i>biχ^vābān</i>	

(6) Mn.P. final *-āb* usually appears as *-āv* in B χ . (*v* labio-dental) :

<i>bāv</i>	main tribe	(? <i>*bāb</i> , or Ar. <i>bāb</i>)	
<i>avāv</i>	answer	<i>javāb</i>	Ar.
<i>qassāv</i>	butcher	<i>qaššāb</i>	Ar.
<i>rikāv</i>	stirrup	<i>rikāb</i>	Ar.

(7) Mn.P. *ūb* is represented in B χ . by *ū* or *uv* :

<i>ēū</i>	stick, wood	<i>ēūb</i>	
<i>ikū(w)um</i>	I pound	<i>mīkūbam</i>	
<i>χū</i> , <i>χuv ē</i>	good, it is good	<i>χūb</i> , <i>χūb ast</i>	
<i>suv</i> , <i>suvā</i>	morning,	<i>šubh</i> , <i>šabāh</i>	Ar.
	to-morrow morning		

(8) Mn.P. final **b** after other vowels is represented by Bχ. **v** :

<i>aiv</i>	fault	'a.īb	Ar.
<i>Haiiv Ullāh</i>	proper name	<i>Habīb Ullāh</i>	Ar.
<i>jēv</i>	pocket	<i>jīb</i>	

See § 48.2.

<i>rikāv</i>	stirrup	<i>rikāb</i>	Ar.
<i>sa’āv, sā’iv</i>	owner	<i>ṣāḥīb</i>	Ar.
<i>sēv</i>	apple	<i>sīb</i>	
<i>siv</i>	morning	<i>ṣubḥ</i>	Ar.
<i>tājuv</i>	surprise	<i>ta’ajjub</i>	Ar.

also after *a* and *e* in the Arabic words :

<i>adev</i>	respect	<i>adab</i>	Ar.
<i>talav</i>	claim	<i>ṭalab</i>	Ar.
<i>matlav</i>	matter, story	<i>maṭlab</i>	Ar.

In these cases the sound appears to me to approximate to that of *v*; where it occurs initially, and generally where it occurs medially, it seems to have more the sound of *w*.

(3) *-āb* gives Bχ. *au* in

<i>āftau</i>	sun	<i>āftāb</i>

(7) Bχ. va-, wa-, bi- = Mn.P. uf(t)-; but cf. § 49.6 b

<i>vastan</i>	to fall	<i>uft-ādan</i>
(<i>iyūftum</i>	I fall	<i>mīuftam</i>)
<i>bista</i>	lying about	? <i>uftāda</i> Vide § 49.6 b

(8) Bχ. w, v, as an off-glide from *ō*, *ū*, *au*

<i>auwistūñ</i>	pregnant	<i>ābistan</i>
<i>ēuwā</i> (sg. <i>ēū</i>)	pieces of wood,	<i>ēūbhā</i>
	sticks	
<i>ikūwē</i> <i>bikū</i>	hepounds, pound	<i>mīkūbad</i> , <i>bikūb</i>
<i>χuv-ē</i> <i>χū</i>	it is good, good	<i>χūb ast</i> , <i>χūb</i>

<i>iχu-v-ē</i>	thou wishest	<i>mīχ^vāhī</i>
<i>iχu^vī, iχō^vē</i>		
<i>jā^vī hama-</i>	the (accustomed)	<i>hama šab + ī</i>
<i>šauwī</i>	place of every night	

In all these cases, however, the *w, v* may represent the original *b*.

(9) The Bχ. *w, v*, also appears, but not universally, after an *ō* or *ū*, where an intervening *n* has been lost or degraded into a nasalization of that vowel:

<i>dōwist</i> <i>dōñist</i>	he knew	<i>dāñist</i>
<i>dūñist</i>		
<i>hōwa</i> <i>hōña</i>	house	<i>χāna</i>
<i>inišowum</i>	I make sit down	<i>mīnišānam</i>

(10) Bχ. *v* between vowels may be lost.

<i>irum</i> <i>iruvum</i>	I go
<i>irīm</i> <i>irivīm</i>	we go

In *gyāhīdē* || *gīyōhīdē*, "giving information against thieves," which is presumably for *gawāhī dih*, the *w* has probably been lost and the *y* developed out of the palatal *g*; otherwise the *y* must represent the *w*.

(11) Other examples of *w, v, v* in Bχ. are:

<i>jallāv</i>	male lamb		
<i>javāv</i>	answer	<i>jawāb</i>	Ar.
<i>qārwā</i>	dice		Ar. <i>ka'b + hā?</i>
<i>saχv</i>	roof, ceiling	<i>saqf</i>	Ar.
<i>serwāz</i>	foot soldier	<i>sarbāz</i>

(b) *Note.*—1. *wastan*, “to fall”; *iyūftē*, “he falls”; where *wastan* is to be compared with Phl. *ōpastan* ← O.P. **ava-pastanay-* ($\sqrt{pat- + tanaiy}$); cf. Mn.P. *past*, “low, mean”, v. Hü. 92, who regards Mn.P. *uftādan* as a new formation from the present base *uft-*.

2. *gyēristan* || *girēdan*, only in the sense of “to knock up against” (Mn.P. *giriftan*), seems to be a derivative compounded from a present base *gyēr*, corresponding to Mn.P. *gīr + istan*. (There is only one present base in Bχ., *-gir-*, with a short vowel.)

In neither of these cases, therefore, does the Bχ. *st* correspond to Mn.P. *ft* as might appear at first sight.

(c) In a few cases of medial *st* Bχ. loses the *t*:

<i>dasmāl</i>	handkerchief	<i>dast(i)māl</i>	
<i>isrāhat</i>	ease	<i>istirāhat</i>	Ar.

(d) Bχ. *ist-* = Mn.P. *sit-*:

(2) Reference has been made in paragraph 19 to the modifications which are to be observed in the *n*-sound.

Essentially it is a normal, full-blooded dental *n* as in English, but according to its position it is liable to degradation. Much individual variation exists both in regard to when this degradation takes place and to how far it is carried; even the practice of the same individual is not constant.

Generally speaking

final *ōn, ūn, ān, ān* sound as *õ, ũ, ã, ã*

and medial *n* between vowels where the first vowel is one of those just mentioned generally passes into a nasalization of this first vowel.

Initial *n* is always normal.

Final *n* following any vowel other than those mentioned above remains normal; only occasionally in the case of

-īn have I heard *-ĩ.*

(3) In the case of medial and final *n* described above all variations are heard, some individuals favour nasalization of the vowel, some the full *n*-sound.

I think there is also an intermediate sound in which the nasalized vowel is followed by some suspicion of an *n*. This I have represented by the writing *ñ*.

As stated in § 19, it is not improbable that this is

wrong. It might be safer to show the vowel as nasalized and add a small *n*, thus: \tilde{n} .

With some people the nasalized vowel is followed by a *w*-glide where the vowel is \bar{o} or \bar{u} .

Occasionally the nasal seems to be lost entirely.

These statements may be illustrated by the following examples of alternative pronunciations:

dānist *dūñist* *dū̃nist* *dū̃wist* he knew Mn.P. *dānist*
(or the vowel \bar{o} throughout).

hōna *hōña* *hō̃na* *hō̃wa* house *χāna*
(or the vowel \bar{u} throughout).

inišōwum Mn.P. *mīnišānam*

Where the *w* occurs I sometimes suspect the nasalization of being continued into it, which is, I suppose, phonetically possible.

I have not recorded any instance of the occurrence of two \tilde{n} 's in one word, thus:

$\bar{u}\tilde{n}\tilde{n}$ they $\check{c}u\tilde{n}\tilde{n}$ such

(4) *n* immediately preceding other consonants is guttural, viz. ɤ , when the consonant is *g*, and may perhaps be palatalized when the consonant is *j* or \check{c} .

Horn, however, does not appear to recognize the existence of palatal *n* in Mn.P. *Vide* G.I.P. i, 2, § 23, l. 1, and \check{c} and *j*, as above noted, really begin with the dentals *t* and *d*.

Otherwise, as far as I know, *n* is found only before *d*, and occasionally before *t* and *z* of the remaining consonants.

Before *d* and *t*, as a rule, *n* is purely dental, though I have heard *vāⁿdum* for the regular *vandum*, "I threw," and

$\left. \begin{array}{l} n\bar{u}\tilde{n}zd\bar{a}h \\ p\bar{u}\tilde{n}zd\bar{a}h \end{array} \right\} \text{alternate with } \left\{ \begin{array}{l} n\bar{u}nzdah \\ p\bar{u}nzdah \end{array} \right.$

This root shows in Av. various present bases with ending in *-ya*. Vide Altir. Wb. s.v. $\sqrt{\text{grāb-}}$ and G.I.P. i, 2, p. 28.

pērist, i-pēr-ē it flew, leapt, *parīd, mī-parad*

kērd, beside *kerd*, *kērd* is probably simply the effect of the palatal *k*.

mālīdan : māl-

Vide G.I.P. i, 2, p. 133; Av. pres. base *marəza- : mərəza-*

(c) In its treatment of Av. *arə + t, ərə + t* Bχ. usually agrees with Mn.P. The following variations may be noted:

<i>χārd-</i> , <i>χārd-</i> : <i>χur</i> to eat	<i>χ^vurd-</i> : <i>χur-</i>
<i>gert</i> dust	<i>gard</i>
<i>ārt</i> <i>ārd, ārd</i> flour	<i>ārd</i>
<i>išmārd-</i> : <i>išmār-</i> to count	<i>šumurd-</i> : <i>šumār-</i>

Av. ppc. *mərəta-* and *marəta-*; pres. base *mara-*, *māra-*, and *hišmār-*; Skr. $\sqrt{\text{smṛ}}$.

ispārd || *ispurd* : *ispār-* to commit to *supurd-* : *sipār-*

Hü. 697 states that *supurdan* is the original infin., and that Mn.P. *sipārdan* and Kāshānī *espōrtan* are new formations from the present.

(d) The Bχ.

bigudertē : bigudert he may pass, *biguzarad : biguzar*

is difficult to account for. The past is *guzašt, gudašt, giyāšt*. There may be confusion with

i-gard-um I go about

which, it may be noted by the way, loses its *d* in the causative

germīdum I made turn back Mn.P. *gardānīdam*;
O.C.P. *gardāndam*

(3) Bχ. *h_r, r* = Mn.P. *χ_r*. Vide § 37.4 c.

(4) O.P. *r+s*, Av. *arə+s*, *ərə+s* are represented in B_χ by *rs* as in Mn.P.:

<i>hars</i>	tear(s), <i>n.</i>	<i>ers</i> (H. 694)	Phl. <i>ars</i> ; Av. <i>asrū</i> ; Skr. <i>áśru-</i>
<i>purs</i>	inquiry	<i>purs</i>	O.P. inchoative stem <i>parsa-</i> ; Av. <i>pərəsa-</i>

<i>aštan</i>	to leave	<i>hištan</i>	Av. $\sqrt{\text{harəz-}}$
<i>māštan</i>	to rub		Av. $\sqrt{\text{marəz-}}$

(6) In B_χ. *r* occurs, apparently intrusively, in some words in which the Mn.P. equivalents lack it:

ijūran (infin. they seek *mījūyand* Cf. Jew.P. *jūrišn*,
justan) search; G.I.P. i, 2,
§ 79

kūčir little, small *kūčik*

pl. *mužgān*

teristan to be able (to) (Cf. *tawānistān*)

just-: *jūr-* is perhaps on the analogy of *šust-*: *šūr-*

(7) Mn.P. *r* lost in B_χ. before *š* and *s* in:

(2) Bχ. *h* = Mn.P. χ, chiefly O.P. Av. χ

This change is chiefly noted in the initial position and medially before a consonant. Initial χ is often heard as an alternative to *h*. On the other hand medially the *h* itself is, more often than not, dropped.

(3) B χ . *h* as a glide between vowels occurs chiefly after long vowels

ā, *ō*, *ū*, and *oi* = *ā*.

Its use is not fixed; some people appear to use it little if at all, and to employ no perceptible glide between adjacent vowels, or in some cases to prefer to insert a *y* in the neighbourhood of a palatal vowel.

i-y-ā-h-ē || *iyō-ē* he comes

ibū-h-ē || *ibū-ē* he is, becomes

da-h-ā || *da-ā* prayers, petitions *du'ā* Ar.

igō-h-ē || *igō-ē* he says

jā-h-ē || *jā-ē* a place

māl i kē-h-ina? whose is it?

(*i kē* = whose; (*n*)*a* = is)

izā-h-ē, she gives birth to, *mizāyad* Av. $\sqrt{\text{zan-}}$

zā-h-īda || *zoi'īda* having given birth to

Where the glide is omitted and the second vowel is short there is frequently contraction, e.g.:

ibām || *ibāhum* I become

igum || *igōhum* I say (radical vowel is *ō*, *ū*)

iyom || *iyāhum* I come

<i>igō</i> (see above)	he says
<i>iyā</i>	he comes
<i>iχō</i>	he wants

<i>wa</i> $\left\{ \begin{array}{l} hō \\ hu \end{array} \right\}$ <i>kē</i>	and he who	<i>wa ū ki</i>	
<i>hamī jūr</i> (h) <i>unē</i>	it's just like this	<i>hamīn jūr ast</i>	
	(perhaps for <i>hō + nē</i>)		

Also in Bχ. *hašt*, *hēd*, *hēš* (plough), following Mn.P. *hašt*, *hast*, *χīš*; see above, subsections (1) and (2).

(5) Loss of h in Bχ. :

(a) Medial *h* between vowels, especially following a short vowel, is as a rule dropped and the two vowels then coalesce :

<i>nā'alīn</i>	don't let	<i>na hilīd</i> (obsol.)	
<i>n'āštīnsūñ</i>	they didn't let them	<i>na hištand šān</i> (obsol.)	
<i>čār</i>	four	<i>čahār</i>	O.C.P. <i>čār</i>
<i>čil</i>	forty	<i>čihil</i>	O.C.P. <i>čil</i>
<i>idum, idē</i>	I give, he gives	<i>mīdiham, mīdihad</i>	
<i>χurzā</i>	sister's child	<i>χ'āharzāda</i>	
<i>inum, etc.</i>	I place	<i>mīniham</i>	
<i>ijum</i>	I jump, run off	<i>mījaham</i>	

(b) Where there is reason to retain the two vowels distinct the *h* is frequently retained or reintroduced as a glide :

$i\chi\bar{o}i \parallel i\chi\bar{o}h\bar{i}$	thou wishest	$m\bar{i}\chi^v\bar{a}h\bar{i}$	
$i\chi\bar{o}n \parallel i\chi\bar{o}han$	they wish	$m\bar{i}\chi^v\bar{a}hand$	
$s\bar{a}iv, s\bar{a}^rv$	} \parallel $sah\hat{a}v$ owner	$\bar{s}ah\hat{i}b$	Ar.
$s\bar{a}v, sa\hat{a}v$			

Initial

$\chi ud\hat{a} (h)\hat{a}f\bar{i}z$ God protect you, good-bye

(c) *h* before a consonant is in general unstable :

$m\bar{e}m\bar{i}n\bar{u}\bar{n}$	guests	$m\bar{e}hm\bar{a}n-h\bar{a}$
$m\bar{e}rab\bar{u}n\bar{i}$	kindness	$m\bar{i}hrb\bar{a}n\bar{i}$
$tuhm \parallel tum$	seed	
$suhr \parallel sur$	red	

(6) Other examples of *h* in $B\chi$:

From what has been shown above it will have been seen that *h* is a somewhat uncertain sound. Initially it may be inorganic, and medially between vowels it may be also merely a glide and inorganic. Immediately preceding a consonant it appears always to have an etymological value, but then it is very liable to disappear. When final it is often extremely difficult to decide whether it really exists or not.

MISCELLANEOUS PHONETIC PHENOMENA

A few further phenomena may be separately mentioned.

60.

VOWEL CHANGE

The vowels show a good deal of optional variation both in quantity and quality. The most common cases have been mentioned in dealing with the individual vowels.

Vowels are also liable to alteration in quality under the influence of adjacent sounds. In particular a palatal tends to palatize a vowel in its neighbourhood and a labial or an *ā* to labialize it.

Thus, usually, though there is a good deal of variation :

<i>iruvum</i>	I go
<i>irivī</i>	thou goest

Examples

<i>bāluq</i>	of age	<i>bāliq</i>	Ar.
<i>binīyèrum</i> (also <i>binīyer, binīyār,</i> impv.)	let me see	<i>binīgaram</i>	
<i>bugo</i>	say	<i>bigū</i>	
<i>bawūs</i>	his father	Bχ. <i>baw + as</i>	
<i>χuja</i> , pl. <i>χujēhā</i>	merchant	<i>χ^vāja(hā)</i>	
<i>jīst</i>	he leapt, ran off	<i>jāst</i>	
<i>sudā</i>	noise	<i>šadā</i>	Ar.
<i>suhāv</i> <i>sāv</i>	master, owner	<i>šāhib</i>	Ar.
<i>sulo</i>	counsel	<i>šallāh</i>	Ar.
<i>wulāt</i>	country	<i>wilāyat</i>	Ar.

Many other examples will be found in the illustrations throughout this article.

In *aχtīār* || *iχtīār* the initial *a* is probably due to the following *χ*.

The negative particle *na* regularly changes to *nē* before the *i*- prefix of the present indicative or any other *i*.

<i>nēikunen</i>	they do not do
<i>nēizanī</i>	thou dost not strike
<i>nēilē = na (h)ilī</i>	thou mayest not permit

61.

ELISION OF VOWELS

Internal

(1) Elision, or coalescence, of vowels is common where an intervening consonant has fallen out.

<i>ar</i> <i>ar</i> <i>ayer</i>	if	<i>agar</i>
<i>wuristān, wuristān</i> , they stood up		
<i>wuristādan</i>		

Vide § 42.2 and § 44.11 c.

\hat{a} may absorb a following i :

<i>mazāqa k.</i>	to grudge	<i>muzā'īqa</i>	Ar.
<i>tāfa</i> <i>tā'ifa</i> <i>toi'ifa</i>	tribe	<i>tā'ifa</i>	Ar.
<i>malāka</i>	angel, angelic	? Ar. <i>malā'ik</i> ,	angels

External

(2) External elision is general where one of the enclitic forms of the personal pronouns, or the verb to be, which begins with a vowel, follows a word ending with a vowel.

If one of the vowels is long it survives, while short u and i seem to defeat short a or e , \hat{e} .

<i>bāl' i au</i>	at the water-side	<i>bālā i</i> (the second \hat{a} is unstressed and not really long)
<i>b'is, b'ès</i>	to him, etc.	<i>ba + is (as)</i>
<i>bin'is</i>	put it down	<i>binè-is</i>
<i>č'i't ē?</i>	what's the matter with you?	<i>č'i-at-ē?</i>
<i>gusn'um ē</i>	I'm hungry	<i>gusna-um</i>
<i>humsā's</i>	her neighbour	<i>humsā-as</i>
<i>mēr'it</i>	thy husband	<i>mēra-it</i>
<i>īmā sahāv ē</i>	we are the owners	<i>nīla-īm</i>
<i>moi'yūn nīl'īm</i>	of the grey mare	
<i>inī's</i>	thou placest it	<i>inī-as</i>
<i>rī's</i>	upon it	<i>rī-as</i>
<i>sī't</i>	for you (sg.)	<i>sī-at</i>
<i>tā^ad'is k.</i>	to put a splint on it	<i>tā'ada-is</i>
<i>wā't</i>	with thee	<i>wā-at</i>
<i>zēn'ē, zēn'it</i>	a wife, thy wife	<i>zēna-ē, zēna-it</i>
<i>z'um</i>	from me	<i>zē-um</i>

(3) The negative prefix $n\hat{a}$ absorbs an initial vowel in
nā'lāj without remedy

The negative particle na is usually preserved or altered to $nē$, see above, § 60.

(4) The vowel of the pronominal suffixes is elided after the preposition *wur*, e.g.:

<i>wur'm, wur't, wur's</i>	on me, thee, him
<i>čur's</i>	what on it?

(5) Two adjacent long vowels are usually maintained:

<i>dōlūē</i>	an old woman
<i>pīāē pīāhē</i>	a man

In the forms *igō || igōē*, he says; *iyā || iyāē*, he comes; *iχō || iχōē*, he wishes, the second vowel was probably first shortened by the stress falling on the first vowel and then absorbed.

(6) The *izāfa* is sometimes elided or dropped, but more usually persists:

<i>ba andāza-i—</i>	to the amount of
<i>dūstī i mun o tu</i>	the friendship of me and thee
<i>raχtā i χum</i>	my clothing

The following are, however, a few examples of its suppression:

<i>dārī bī hūšī</i>	a drug producing loss of senses
<i>tū didū munī</i>	you are my sister
<i>katχudā māl</i>	the headman of the camp
<i>pasmanda (i) īrūñ ē</i>	she is the leavings of Persia
<i>ba nazdikī yē ābōdīē</i>	in the neighbourhood of a village
<i>nišašt pā pušta</i>	he sat down at the foot of the load

62.

CONTRACTION

Contraction as apart from that produced by the elision of one of two adjacent vowels appears in:

<i>dār̄yah</i>	Superintendent of Police	<i>darōyah</i>	Ar.
<i>mur̄χas</i>	allowed to go, to do, etc.	<i>muraχχas</i>	Ar.
<i>mūr̄wat</i>	generosity	<i>murūwat</i>	Ar.

63.

CONSONANTAL SANDHI

Cases of the change of consonants from voiced to voiceless, or vice versa, according to the nature of a contiguous sound are fairly common :

- (a) *aχt* || *aqd* betrothal 'aqd Ar.
ārt || *ārd* flour
kač kārđ crooked knife for *kaj kārđ*
panč tā five for *panj tā*
qais kerd he became angry Mn.P. *γēz kard*
raht pai i . . . he went after . . . for *rahd pai . . .*
- (b) *asp*, but *asbē* horse
baχt, but your good fortune
baχdat
izad bukunē you should pay 'izzat Ar.
 respect to
iχdilāt conversation iχtilāt Ar.
haf kaug he used to shoot seven
 (= *kauk*) *izaid* partridges
nisp, but half of
nisb i
hi(j)jā nowhere Mn.P. *hīč jā*

64.

METATHESIS

In the majority of cases of metathesis an *r* or *l* sound is affected :

<i>aršafī</i>	gold coin	<i>ašrafī</i>	
<i>urm</i>	age, life	' <i>umr</i>	Ar.
<i>urz</i>	excuse	' <i>uzr</i>	Ar.

65.

REDUPLICATION

(1) At least two instances occur of reduplication of a root being employed to form a single word:

<i>pēpèhîn</i>	all fat and juicy
<i>rērèhîn</i>	all be-dunged

which appear to be the simple words *pîh* and *rî(d)* reduplicated with the adjectival suffix *-în* added.

(2) Reduplication of words used in an adjectival or adverbial sense denoting distribution or continuousness is fairly common in Bχ. as in Mn.P.:

<i>hawâr hawâr igō</i>	he whispers quietly
<i>do tâ moiγūñ kahër kahër</i>	two black mares
<i>tîka tîka wō bîdan</i>	they went into fragments
<i>yakî yakî</i>	one by one
<i>χailî par par ē</i>	(the hill) is full of ridges and spurs

Notes

(1) $\left. \begin{array}{l} -\bar{u}\bar{n} \\ -\hat{a} \\ -y\acute{e}l \end{array} \right\}$ after nouns are the suffixes to denote the plural.

(2) The forms shown after the infinitives of verbs are the present bases to which the appropriate prefixes and suffixes are added to form the various moods, tenses, and persons of the present.

(3) In forms beginning with *iy-* the prefix of the present indicative *i-* is included.

The subjunctive and imperative prefix in such cases is usually *bē-*, sometimes followed by *y* and sometimes not :

<i>iyārum</i>	I bring	<i>bēār</i>	bring!

II. THE BADAKSHANI AND MADAGLASHTI DIALECTS

INTRODUCTION

THE dialects dealt with in this article are those spoken by the people of Badakhshān and of Madaglasht respectively.

The province of Badakhshān fills the north-easterly corner of Afghānistān. It is bounded on the north by the Oxus, which divides it from the Russian territory, while to the south of it lie Minjān and the mountain districts inhabited by the Kāfir tribes. On the east Badakhshān marches with Chitrāl at the Dōrah Pass, whence the waters of the Lutkoh flow down to join the Chitrāl or Kashgār River a few miles above the historic Chitrāl Fort.

Madaglasht is a small settlement of Persian-speaking foreigners planted in the middle of the principality of Chitrāl and entirely surrounded by the Kōwār-speaking subjects of the Mehtar of that state. It is situated in a high-lying mountain valley some twenty-six miles to the north-east of Drōsh. The Madaglasht stream is also, like the Lutkoh, a tributary of the Chitrāl River, into which it flows, on the left bank, about three miles above Drōsh.

This Persian settlement is of modern origin. Four families are said to have immigrated into Chitrāl from Zibak in Badakhshān. They found employment with the Mīr i Kalān, the great Katōr Mehtar of Chitrāl, as iron-workers, but pressed by poverty some, or all, of them wandered on further afield to Chutiatan on the Malakand-Chitrāl road in Dir territory. There two of their number died and were buried, and the remainder were invited back to Chitrāl by the Mehtar, who gave them land

to settle on in Madaglasht, where they continue to exercise their craft as iron-workers.

Six generations are said to have elapsed since the immigration, and the colony has increased to some thirty families. The pedigree of the leading family during this period is given as follows:—

Asākāluk
Ustā Qurbān
Shakar
Ustād Murād
Shīr Muhammad

The last-named, Shīr Muhammad, was my informant, and it was from him, and a somewhat brighter and more intelligent henchman, that I extracted the material retailed in the following pages.

For my Badakhshānī material I am indebted to two men of the Werdūj, who have remained nameless, but principally to one Nasīm, son of Laṭīf, hailing from Faizābād.

It will be seen that my sources of information were very restricted, and my informants did not make up for their deficiency in number by any special brilliance of intellect. The time at my command was also limited, as I left Chitrāl shortly after commencing my investigations and was unable to secure fresh informants or even to check the results obtained by cross-examining my original ones as I should have liked to do. In these circumstances the reader must be warned of the probability of individual eccentricities of pronunciation and idiom having been accepted as normal, apart from errors due to misunderstandings on my own part. Our means of communication was not entirely satisfactory, as the colloquial of Modern Persia presented difficulties to my informants, and my practical command of Kōwār, with which the Madaglashtis are well acquainted, was limited.

Anyone who has had experience of trying to elicit the characteristics of a colloquial tongue from an illiterate exponent of it will, in these circumstances, expect neither complete knowledge nor entire absence of error.

From the material here presented, however defective, it is sufficiently clear that these two dialects, which appear to be historically one and do not differ in any essential respect, are merely a form of the ordinary Modern Persian of Persian literature known as "Classical Persian". They are no separate Iranian dialects such as Yudghah, spoken by a small community at the head of the Lutkoh valley, and a number of other petty languages spoken in the Pamir region.

It is probable that they are very similar to "Kābuli Persian", the language of the Afghān court, and to the form of Persian which is used for correspondence in Chitrāl.

The Vocabularies present some words which are entirely strange to me, such as :

M.	<i>alaxšâ</i>	jaw
B.M.	<i>lakik</i>	finger
B.M.	<i>fârîdan</i>	to wish, desire

and some borrowings from Kōwār, Pashtū, and Hindūstānī, but the number of these is on the whole surprisingly small, and the bulk of the words are familiar Persian in ordinary use at the present day in Persia. (See further § 39.)

CONTRACTIONS

The following contractions and abbreviations have been employed :—

a.	adjective.
adv.	adverb.
Afγ.	Pashtū, the Afghān language.
B.	Badakhshānī.

Bχ.	dialect of Modern Persian spoken by the Bakhtiārī tribes of S.W. Persia.
Gabrī	Modern Persian dialect, spoken by the Zoroastrian (Zardushtī, Gabrī) communities of Yezd and Kermān.
H.	Hindūstānī.
k.	kerdan.
Ko.	Kōwār, the Chitrāli language.
M.	Madaglashtī.
Mn.P.	Modern Persian in general; the Persian of Persian literature, Classical Persian as opposed to O.C.P.
n.	noun.
O.C.P.	Ordinary Colloquial Persian of the present day.
P.	Panjābī.
P.Ar.	Arabic words used in Mn.P. and in O.C.P.
pr.	preposition.
pro.	pronoun.
š.	šudan.
v. i.	intransitive verb.
v. t.	transitive verb.
z.	zadan

The stress accent, in a few cases where it has been specially noted, is marked by a vertical line over the vowel on which it falls, e.g. *qalwá*.

ñ denotes that the *n*-sound is not complete, but is rather the nasalization of the preceding vowel.

|| between two forms denotes that they are recorded variants of the same word.

* an asterisk before a word indicates that it has not been recorded and therefore must, strictly speaking, be regarded as hypothetical.

PHONOLOGY

1. The ordinary vowel sounds in Badakhshānī and Madaglashtī are:—

<i>ā</i>	as in	law	I.P.A. symbol	ɑ̃ ɑ̃	
<i>ā</i>	„	far	„	„	<i>a a:</i>
<i>à</i>	„	cat	„	„	æ
<i>a</i>	„	but	„	„	ʌ
<i>-a</i>	}	the same as <i>ā</i> but shorter			
<i>-ah</i>					
<i>e</i>	as in	her	„	„	ə
<i>ē</i>	„	date (Scots)	„	„	e (Scots)
<i>è</i>	„	death	„	„	ɛ
<i>ī</i>	„	machine	„	„	i:
<i>i</i>	„	pin	„	„	ɪ
<i>ū</i>	varying between French		„	„	y to œ
		<i>ému</i> and <i>peur</i>			
<i>ū</i>	as in	loop	„	„	u:
<i>u</i>	„	put	„	„	u
<i>ō</i>	„	mote (Scots)	„	„	o (Scots)
<i>o</i>	„	not	„	„	ɔ
<i>ai</i>	„	die	„	„	aɪ
<i>au</i>	„	howl	„	„	aʊ
<i>oi</i>	„	boil	„	„	ɔɪ

~ over a vowel means that it is nasalized.

A point between two vowels indicates a hiatus.

The vowel sounds of B. and M. are the same, or practically the same, as those of ordinary colloquial Modern Persian, with the exception of *è* and *ū*, which are not found in Standard Persian, and of *ē* and *ō*, which in these dialects are usually monophthongal, while in O.C.P. they are more or less diphthongal as in English, i.e. *ē.i* and *ō.u*, as in *dē.it* (date), *mō.ut* (mote).

2. *ā̃*, *ā̄*.

ā̃ is in both dialects the commonest pronunciation of etymological *ā*, but *ā̄*, *o*, and *ō* are also heard,

\bar{a} principally in M. o might frequently be more correctly represented by \bar{a} , the short of \bar{a} , the actual sound lying between \bar{a} and o .

n and m do not exert as strong an influence on a preceding \bar{a} as they do in many dialects of Mn.P. and even in O.C.P.

$\bar{a} + n$ is usually pronounced $\bar{a}n$, sometimes $\bar{a}n$ and $\bar{o}n$ or on , but seldom $\bar{u}n$ as in vulgar O.C.P.

We have, however, M. $n\bar{u}n$ against B. $n\bar{a}n$, $n\bar{a}$.

In general the tendency for \bar{a} to become \bar{o} appears to be stronger in M.; cf.:

M.	<i>rōn</i>	B.	<i>rān</i>
M.	<i>bōm</i>	B.	<i>bām, bāng</i>
M.	<i>jūryōt</i>	B.	<i>juryāt</i>

3. a, e.

(a) a and e are fairly constant, though occasionally influenced by a neighbouring palatal or n :

B.	<i>ĕimĕa</i>	M.	<i>ĕamĕa</i>
B.	<i>pānj</i>	M.	<i>pānj</i>

$-a + m$ is usually $-am$, but sometimes $-um$ as in the ordinals:

B.M. *ĕārum* fourth

Before r the sound is usually e .

(b) a is sometimes replaced by \bar{a} in B., e.g.: $\bar{a}sp \parallel asp$; $lang\bar{a}r\bar{i} \parallel M. langar\bar{i}$; B.M. $guz\bar{a}ram$ for Mn.P. $guz\bar{a}ram$, I pass by; on the other hand, B.M. $guza\bar{s}tan$ for Mn.P. $guz\bar{a}s\bar{t}an$, to leave behind.

It may be remarked that the languages of the neighbouring Chitrālī and Kāfir tribes show great uncertainty of vowel length and, within limits, quality.

(c) $e = Mn.P. \bar{u}$.

B.	<i>kerta</i>	shirt	Mn.P.	<i>kurta</i>
B.	<i>mĕxeran</i>	they eat	„	<i>māx^vurand</i>
B.	<i>mery</i>	fowl	„	<i>mury</i>
M.	<i>müry</i>			

B. <i>siperz</i>	spleen	Mn.P. <i>sipurz</i>
M. <i>xerd, xertik</i>		„ <i>xurd</i>
M. <i>de</i>	two	„ <i>dū</i>
B. <i>du, do</i>		
M. <i>ne</i>	nine	„ <i>nuh</i>
B. <i>nū^h</i>		

Compare B.M. *murd*; B. *mēmbera*, M. *mīmerad* with Mn.P. *murd*; *mīmīrad*, where the present base is probably formed on the analogy of the past base, or else derived from an old simple present theme of the root *mar-*. Cf. Gabri *imērīt*, which similarly fails to correspond to the Mn.P. *mīmīrad*.

4. ē.

(a) \bar{e} = Mn.P. \bar{e} (O.C.P. \bar{i}), usually corresponding to O.P. *ai*, Av. *aē*.

In B. the \bar{e} sound is generally preserved, while in M. it is usually changed into \bar{i} as in the present-day speech of Persia:

B. <i>bēd</i>	M. <i>bīd</i>	willow
<i>bēl</i>	<i>bīl</i>	spade
<i>bēmār</i>	<i>bī^hmār</i>	ill
<i>dēg</i>	<i>dīg</i>	pot
<i>mē-</i>	<i>mī-</i>	verbal prefix pres. and imperfect tenses
<i>safēd</i>	<i>safīd</i>	white
<i>sē.ū</i>	<i>sī.ū</i>	apple
but B. and M. <i>gurēxt-</i> : <i>gurēz-</i>		to run away

(b) M. $\bar{e}.i$ = $\begin{cases} -\bar{a} + i \\ -ah + i \end{cases}$

<i>bē.i</i> = <i>bah + i</i>	to
<i>deri.ē i kalân</i>	a big sea
<i>xânē i xidaš</i>	his own house

(c) \bar{e} replaces \bar{a} in :

B. <i>χēstam</i>	Mn.P. (ber)χ ^v <i>āstam</i>	I rose up
------------------	--	-----------

probably, however, owing to the analogy of the present base $\chi\bar{e}z-$, Mn.P. (*ber*) $\chi\bar{e}z-$.

The M. is *weryχīstam* : *weryχīz-*.

(d) B. \bar{e} = M. *ya-* in B. *ēla*, M. *yalā*, open.

(e) \bar{e} alternates occasionally with *ai* :

B.M.	<i>baital</i>	horse, mare
M.	<i>bētalča</i>	filly (?)
M.	<i>bē.i, bai.i</i>	Mn.P. <i>ba, bi, to</i>

5. è.

This sound occurs occasionally in place of *a, e; ē; u* and *i(h)* :

B.	<i>mēbēzam</i>	I sift	<i>bibèzīn!</i>	sift!
B.	<i>čè, čē?</i>	what?	Mn.P. <i>čih?</i>	O.C.P. <i>či, čē?</i>
B.	<i>dèk, dēg</i>	pot	Mn.P. <i>dēg</i>	O.C.P. <i>dīg</i>
M.	<i>dīk, dīg</i>			
B.M.	<i>kèrra i asp</i>	foal		cf. O.C.P. <i>kurra i asp</i>
B.	<i>χèrdīm </i>	we ate.		Mn.P.
	<i>χürdīm</i>			<i>χ^vurdīm</i>
M.	<i>χürdīm</i>			
B.	<i>mèz</i>	table	Mn.P. <i>mēz</i>	O.C.P. <i>mīz</i>
B.	<i>tèz</i>	quick		O.C.P. <i>tīz</i>
M.	<i>tēz, tīz</i>			
B.	<i>mētēm</i>	I give	Mn.P. <i>mīdīham</i>	
B.	<i>kün-, kin-, kèn-,</i>	pres. base of vb. to do,	Mn.P.	
	<i>kun-</i>			

6. ī.

(a) \bar{i} corresponds to Mn.P. \bar{i} , O.P. Av. \bar{i} .

B.M. *šīr* milk Mn.P. *šīr*

(b) \bar{i} occurs sometimes in place of, or alternating with, *i* :

B.	<i>īmrūz</i>	<i>bīrāder</i>	<i>χatārīk</i>	<i>na tonīstum</i>
	<i>berīnj</i>	<i>jīger</i>	<i>mīs</i>	
M.	<i>bīsi.ār</i>	<i>dīl</i>		

(c) \bar{i} = Mn.P. \bar{e} , O.C.P. \bar{i} .

This equation is chiefly found in M.

B.	<i>bēl</i>	M.	<i>bīl</i>
	<i>dēwāl</i>		<i>dīwāl</i>
	but <i>hīzum</i>		<i>ēzum</i>

(d) \bar{i} = Mn.P. *-ih*, O.C.P. *-ih-*, \bar{e} .

B.	<i>mētī.a</i>	M.	<i>mīdīhad</i>	Mn.P.	<i>mīdihad</i>
	<i>sē, sē</i>		<i>sī</i>		<i>sih</i>

(e) \bar{i} = Mn.P. *u*.

B.M.	<i>dīnyā</i>	Mn.P.	<i>dunyā</i>	
B.M.	<i>jīl</i>		<i>jul</i>	Hindu-
B.	<i>jūl</i>			stānī <i>jhūl</i>
M.	<i>šīt, šīd</i>		<i>šud</i>	
(B.	<i>-u-, -ū-, -i-</i>)			
B.M.	<i>šīš</i>		<i>šuš</i>	

(f) B. *čādīr, čādēr* may be compared with Gabri *čuwēr*.
The O.C.P. is *čāder, čādur*.

M. *tsāder* may be compared with Afḡ. *tsādar*;
and M. *tsader* (if the form is correct) with Hindu-
stānī *čuddar*.

(g) The change $\bar{u} \rightarrow \bar{i}$ common in many dialects of
modern Persian (e.g. Bḡ. *dīr* = *dūr*, far) has not
been noted either in B. or M.

7. i.

(a) *i* = Mn.P. *i*, O.C.P. *i*.

B.M.	<i>pider</i>	Mn.P.	<i>pīdar</i>
------	--------------	-------	--------------

(b) *i*, as an alternative with \bar{u} , = Mn.P. *u*.

B.	<i>mēkinem, mekünem</i>	Mn.P.	<i>mīkunam</i>	
M.	<i>mīkinam, mīkünam</i>			
B.M.	<i>sīrχ</i>	M.	<i>sūrχ</i>	<i>surχ</i>
B.	<i>tīχm, tuχm</i>			<i>tuχm</i>
M.	<i>tuχ^em</i>			
B.	<i>kīšā</i>	M.	<i>kūšā</i>	<i>kūjā</i>

8. \bar{u} .(a) \bar{u} = Mn.P. \bar{u} , O.C.P. \bar{u} .

B.M.	<i>dūr</i>		$\chi\bar{u}n$
	$\chi\bar{u}b$		<i>būd</i>

(b) \bar{u} = Mn.P. \bar{a} , O.C.P. \bar{a} , \bar{u} before *m* and *n*.

B.	<i>dūmād</i>	M.	<i>dāmād</i>	Mn.P.	<i>dāmād</i>
----	--------------	----	--------------	-------	--------------

B.M.	<i>-šūn</i>	them, their	<i>-šān</i>

(B. *tār*)9. *u*.(a) *u* = Mn.P., O.C.P. *u*.

B.M.	<i>šumā, guftan.</i>
------	----------------------

(b) Mn.P. *u* is, however, frequently represented by \bar{u} and *i*.

B.M.	<i>gül</i>	flower	Mn.P.	<i>gul</i>
------	------------	--------	-------	------------

B.M.	<i>kün-, kin-</i>		<i>kun-</i>	pres. base of

(c) *u* = Mn.P. *a* before *m*.

B.	-um	termination of ordinals	Mn.P.	-am
M.	<i>mīdum</i>	I give		<i>mīdiham</i>
B.	<i>mētēm</i>			
B.	<i>mēgum</i>	I say		<i>mīgōyam</i>
M.	<i>mīgum, mīgō.am</i>			

Note also

M.	<i>dust</i>	hand, arm		<i>dast</i>
B.	<i>dast</i>			

10. *ō* and *o*.

(a) *ō* = Mn.P. *ō*, O.C.P. *ū*.

B.M. *ōra* him, etc. O.C.P. *ūrā*

B.M. *furōχt-: furōš-* to sell
also *furūš-*

M. *bigō!* say!

(B. *bugū!*)

B. *mēgō.a* he says

M. *mīgō.ad*

B.M. *pōst* skin

B.M. *rōda* entrails

B. *sōχt* it burned

all with *ō* in Mn.P. and *ū* in O.C.P.

(b) *ō* and *o*, alternating with *ā*, *ā* = Mn.P. *ā*, O.C.P. *ā*, *ū*,
especially in M.

B. *bām* M. *bōm* roof Mn.P. *bām* O.C.P. *būm*

χō.er *χōhar* sister *χ^vāhar*

rān *rōn* thigh *rān*

B. *gōsāla* M. *gōsāla* calf Mn.P. *gōsāla*

B.M. *rōγan* ghee O.C.P. *rauγan, rō^uγan*

(d) *o* = Mn.P. *a*.

B.M. *soχt-: sanj-* to weigh Mn.P. *saχt-: sanj-*

11. ai.

There are not many examples of this sound in B. or M. The following are the chief which have been noted:—

B.M.	<i>ai</i>	from	Mn.P.	<i>az</i>
B.	<i>baitəl</i>	mare		
M.	<i>baital</i>	horse		
M.	<i>pai</i>	tendon		
B.M.	<i>paitauwa</i>	putties		
B.	<i>tai i</i>	in		
	<i>tai i</i>	beneath		

In M. the preposition *ba* before a pronoun becomes *bai.i*, *bē.i*.

bē i man to me *bai i šumâ* to you

12. au.

(a) *au* = Mn.P. *au*, *āv*, O.C.P. *ō^u*, *au*, *āv*.

B.M.	<i>aurat</i>	woman	(Arabic 'aurat)

B.	<i>birau.am, birawam</i>			I go	
	<i>šinauwīdan, bišinau</i>			to hear ;	Mn.P. pres.
				listen !	base <i>šinō-y-</i>

13. oi.

Alternately with *ā.i* for *ā* followed by *y* or *ī*.

B.	<i>mē.oiyam</i>	M.	<i>mī.oiyim</i>	I come	Mn.P.	<i>mī.āyam</i>
B.M.	<i>boi.īst</i>			must		<i>bāyast</i>
		M.	<i>goi.īdan</i>	coire		<i>gā.īdan</i>
B.M.	<i>muloiyim</i>			soft	P.Ar.	<i>mulā.im</i>
	<i>zoi.īd</i>			gave	Mn.P.	<i>zā.īd</i>
				birth		
also B.	<i>toi i ser</i>			under		
				the head		
M.	<i>tai i seri</i>			pillow		

14. Attention may be drawn to the following isolated vowel variants :

B.	<i>gīlām</i>			perhaps corresponding to Mn.P. <i>gilīm</i>
				(the meaning of Mn.P. <i>gilīm</i> is given by B.M. <i>qālīn</i> ; while the meaning of Mn.P. <i>qālī</i> is given by B. <i>gīlām</i> , M. <i>zilīmčā</i>)
B.	<i>oi.īn</i>	Mn.P.	<i>āhan</i>	
B.M.	<i>poi.yān</i>	cf. Mn.P.	<i>pāyīn</i>	
M.	<i>zārdālū</i>	Mn.P.	<i>zardālū</i>	
B.	<i>zīrāk</i>		<i>zīrak</i>	

15. The **consonantal sounds** ordinarily heard in Badakhshānī and Madaglashtī are :

<i>q, k</i>	<i>t</i>	<i>p</i>
<i>g</i>	<i>d</i>	<i>b</i>
<i>χ</i>	—	<i>f</i>

γ	δ	w, v
\check{c} (= $t\check{s}$)	(ts)	
\check{j} (= $d\check{z}$)		
s, \check{s}		
z, \check{z}		
$r, l; m, n, ng$ (= ɾ); $y, w^*, v^*; h$		
* as glides.		

There is little or no difference between the sounds represented by these symbols and the corresponding sounds in Mn.P.

16. Loss of Final Consonants.

There is some tendency to drop or slur final consonants. This tendency is more pronounced in B. than in M.

- (a) B. normally lacks the final d of the verbal ending of the 3rd sg. pres., and both B. and M. lack the final d of the 3rd plural:

B. <i>mēkina</i>	M. <i>mīkūnad</i> (or <i>-kūna</i>)	he does
<i>mēkinan</i>	<i>mīkūnen</i>	they do

- (b) Final t following a consonant is often slurred or dropped in B, e.g.:

šas, sixty; *raf(t)*; *guf(t)*; *bē.es*, M. *b'ist*, stand still!; *as* || *ast*, is; also *bā^t* (*bāyad*).

- (c) Final d preceded by z is liable to be dropped:

B. *duz(d)*, *mez(d)*, *naz(d)* Mn.P. *duzd*, *muzd*, *nazd*

- (d) Final $-ab$ is reduced to au in B. *lau* and M. *šau*; and $-āb$ to $-aū$ and $-au$ in B. *aū* (M. *āv*) and M. *χau(b)*, B. *χāb*, *χau*; cf. also B. *sē.ū*, M. *sī.ū*, apple, Mn.P. *sīb*. See § 12b.

17. Unvoicing of Final Voiced Stops.

- (a) Final voiced stops in Mn.P. are frequently represented by the corresponding voiceless stops in B. and occasionally in M. where the phenomenon seems to be chiefly confined to verbal endings:

χ auwândan	χ âbând-	O.C.P.	χ^v âbândan
	χ âwând-		
qalwa		Afγ.	qulba
rikâwî	rikâbî	H.	rikâbî
zuwân	zabân	Mn.P.	zabân

20. Change of Spirant to Stòp.

The change of spirant \rightarrow stop is found in :

M. <i>piltu</i>	match of matchlock	Mn.P. <i>falîtu</i> ,	for
		<i>fatîla</i>	
<i>pûlât</i>		<i>fûlâd</i>	

21. Change of f \rightarrow u, b \rightarrow u.

In B. -af + s and -af + š give -aūs and -auš.

B. γ aus	M. γ afs
kauš	kafš

M. has, however, -ab + k \rightarrow -auk in :

M. <i>karuk</i>	Mn.P. <i>kabk</i>
-----------------	-------------------

22. -ft.

The group -ft appears to give - χ in :

B.M. <i>kuluχ</i>	Mn.P. <i>kuluft</i>
-----------------------------------	---------------------

I have also B.M. *bâ χ t-* : *bâ χ -* for Mn.P. *bâft-* : *bâf-*, to weave, but as I have in addition M. *bâft-* : *bâf-*, it is possible that this equation of *bâ χ t-* is wrong and that it should be bracketed with Mn.P. *bâ χ t-* : *bâz-*, to lose (a game). In that case the present base *bâ χ -* would be due to analogical derivation from the past base.

In any case -ft is usually preserved in both dialects, as is evidenced by B.M. *raftan*, *guftan*, and M. *kuftan*.

23. k and g.

The palatal character of *k* and *g* is often emphasized in M. so that the sounds appear as *kⁱ*, *gy*, e.g. : *kⁱam*, *gyašt*, *gyāšt*.

24. *č* and *j*.

- (a) *č* and *j* correspond to the same sounds in Mn.P., but M. has *tsâder* (and *tsader*), beside B. *čâdēr*, veil, sheet, probably a borrowing of the Afγ. *tsâder*.
- (b) Again, B. *kišâ*, M. *kūšâ* correspond in meaning and use with Mn.P. *kūjā*, and *š* possibly represents *-j-* between vowels.

Is B.M. *šūrīdan*, to seek, want, to be equated with Mn.P. *justan : jū-*, Bχ. *justan : jūr-*?

In M. *pīšâk* *š* possibly represents *č*.

- (c) There is some uncertainty between *s* and *š*, as in various dialects of Mn.P. Thus :

B. <i>līst-</i> : <i>lēs-</i> }	to lick	Mn.P. <i>lišt-</i> : <i>līs-</i>
M. <i>lišt-</i> : <i>līs-</i> }		
B. <i>rīšt-</i> : <i>rēs-</i> }	to spin	<i>rīšt-</i> } : <i>rīs-</i> <i>rist-</i> }
M. <i>rīšt-</i> : <i>rīš-</i> }		
B. <i>šūšt-</i> : <i>šū-</i> }	to wash	<i>šust-</i> : <i>šūr-</i>
M. <i>šīšt-</i> : <i>šūr-</i> }		
B. <i>šīšt-</i> : <i>šīn-</i>	to sit	<i>nišast-</i> : <i>nišīn-</i>
M. <i>šīšt-</i> (<i>binušē!</i> impv.)		

but in general both dialects agree with Mn.P.

- (d) B. *j* = Mn.P. *d* in *jūšīdan*, to milk, Mn.P. *dūšīdan*. *j* occurs for *d* in Kowar, *jū*, two, Mn.P. *dū*. Perhaps the insertion of a palatal glide is the cause, *dy* and *j* tending to interchange, cf. the vulgar "jook" for "duke"; Prakrit *vijjut* for Skr. *vidyut*, French *jour* (*žūr*), Latin *diur-*, etc. I have met Swedes whose nearest approximation to the sound of English *j* was *d + y*, and who always said "dyoke" for "joke" and "dyest" for "jest", and so on.

25. *z*.

z is changed to *i* or dropped in :

B.M. <i>ai</i> <i>az</i>	Mn.P. <i>az</i>	
M. <i>akšâhi</i> ?	(= <i>az kūšâ</i>)	from where ?

M.	<i>gyašt</i>	Mn.P.	<i>guzašt</i>
	<i>gyāšt</i>		<i>guzāšt</i>
and probably in :			
B.M.	<i>bīča</i>	kid,	for * <i>buzča</i> (?)

26. r.

The loss of *r* before *d* in the B. *kad* = *kard*, which is restored in the ppc. *kerda*, appears exceptional.

In the case of B. *χatārik* an *r* has perhaps been dropped before the *t*. I was in doubt whether there was not in fact an *r*-sound. The word is presumably to be bracketed with M. *χertik* and Mn.P. *χurd*.

27. m.

(a) An intrusive *b* is developed after *m* in B. *mē-mbera*, he is dying; cf. Gk. *μβροτός*.

(b) *m* appears to be dropped in :

b'ānīm for *bimānīm*, let us set down

(c) *m* = *n* occurs in :

B.	<i>pām</i>	M.	<i>paham</i>	Mn.P.	<i>pahan</i>
B.M.	<i>wazmīn</i>	heavy	cf. P.Ar.	<i>wazn</i>	

28. n.

-*ng*, except when followed by a vowel, is pronounced *ɳ*. Followed by a vowel it becomes -*ɳg*-.

29. y.

Initial *y* tends to be dropped or modified in B. while retained in M. :

B.	<i>āftamaš</i>	Mn.P.	<i>yāftam-aš</i>
	<i>aχ</i>	M.	<i>yaχ</i>
	<i>ēla</i>		<i>yalā</i> ¹
			open
B.	<i>wē¹rā</i>	M.	<i>yūra</i> (- <i>hā</i>)
presumably the same word.			
			the gums, are

30. w.

- (a) *-w- ← -b-*. See § 19 b.
 (b) *-awā → ā*, *o* is found in B.M. *tānist-*, *tonist-*, Mn.P. *tawānist-*.
 (c) *v* occurs in B. *jilāv*, Mn.P. *jilaru*; *gāv* || *garu*; and M. *āv*, Mn.P. *āb*.

31. h.

- (a) Excrescent initial *h* is met with in:

M.	<i>haber</i>	Mn.P.	<i>abr</i>
	<i>harvāl</i>		<i>aḥwāl</i>
	<i>hišq</i>		<i>'išq</i>

- (b) On the other hand initial *h* is lost in:

B.	<i>(h)amī(n)</i>	Mn.P.	<i>hamīn</i>
	<i>(h)amū</i>		<i>hamān</i>
	<i>īsa</i>		<i>hišsa</i>

- (c) In Mn.P. the *h-* has been maintained through the *haft* series and has then by analogy been continued to the *hašt* series. In B.M. the analogy has been applied otherwise:

B.M.	<i>haft</i>	<i>hašt</i>
	<i>abdah</i>	<i>aždah</i>
B.	<i>aftād</i>	<i>aštād</i>

- (d) In B. *astī*, *astīm*, etc., the spurious *h* of Mn.P. *hastī*, *hastīm*, does not appear.

- (e) Medial *h* is insecure, especially in B.

B.	<i>mēχāham</i> ,	M.	<i>mīχāham</i>	Mn.P.	<i>mīχ^vāham</i>
	<i>mēχōyam</i>				
	<i>χō.er</i>		<i>χōher</i>		<i>χ^vāhar</i>
	<i>pām</i>		<i>paham</i>		<i>pahan</i>
	<i>lēf</i>			perhaps	<i>lihāf</i>
	<i>mēti.a</i>		<i>mīdi(h)ad</i>		<i>mīdihad</i>

32. y and w as Glides.

- (a) As in O.C.P., glides are commonly dispensed with or, at any rate, so reduced as to be negligible in

writing, for in such cases a written *y* or *w* would lead to exaggeration in pronunciation.

The use of glides may be studied in the paradigms of the verbs *guftan* and *âmadan* given in this article, but it is necessary to add that in more careful speech the glides are often restored and emphasized. Thus: M. *mîgoyam* || *mîgum*, but *mîrîm* || *mîrawîm* (where the *w* belongs to the root).

- (b) Especially in B. the tendency to omit glides is sometimes carried further, and juxtaposed vowels are amalgamated as in the last examples given and in:

B. *bišûm yâ na šûm* Should I wash it *šû + um*
or not?

bišûš wash it! *šû + aš*

(*ruftan*), *mêrum* I sweep M. *mîrôyam*

See also the paradigms of *dâdan* and *guftan*.

- (c) Where an intervocalic *h* or *w* has been dropped, a *y* or *w* glide may sometimes arise in its place:

B. *χō.er* M. *χōher*, *χōwerzâda*

B. *mēχōyam* || *mēχâham*

M. *mîrôyam*

- (d) *au* resulting from *ab*, *aw*, tends to develop a secondary *w*:

B. *au w aχ bast* the water froze

birawum || *birau.um* || *birauwum*

šînauwîdan, *šînaurwum* to hear, I hear

- (e) A complication of succeeding vowels is relieved by changing *i* into *y* in:

ai y aspâ of these horses Mn.P. *az în asphâ*

MORPHOLOGY AND CONSTRUCTION

33. Nouns and Adjectives.

- (a) **Plural Termination.** The usual plural termination of nouns is *-hâ*, *-â*, as in O.C.P., but the names of certain animals and relations have their plurals in

-ân (-wân), probably in most cases alternately with -â :

B.	$\chi\bar{o}.er\bar{a}n$	M.	$\chi\bar{o}herw\bar{a}n$	O.C.P.	$\chi^{v\bar{a}}.ar\bar{a}$	sisters
	$gauw\bar{a}n$				$g\bar{a}vh\bar{a}$	cows
B.M.	$sag\bar{a}n$				$sag\bar{a}$	dogs

(b) **Accusative Suffixes.** The accusative suffixes are -râ, -râ ; -a, -na :

B.M.	$\acute{s}um\bar{a} r\bar{a}$		
B.	$ham\bar{i} asp a az k\bar{i}$	From whom did you buy	
	$\chi er\bar{i}d\bar{i} ?$	this horse ?	
	$sar i zulf a$	He cuts his hair	
	$m\bar{i}bura$		
	$\bar{i} \chi\bar{a}ber a kai d\bar{a}da$	When had they given	
	$b\bar{u}dan ?$	this information ?	
	$\bar{i} zam\bar{i}n a qalwa ka!$	Plough this land !	
	$der \acute{s}ahr i Faiz\bar{a}b\bar{a}d$	I saw him in the town	
	$\bar{u}-na d\bar{i}dam$	of Faizabad	
M.	$\acute{c}\bar{u}\bar{c}ah\bar{a}r\bar{a} girifta$	Having caught the cubs	
	$\bar{i} \chi\bar{a}ber a kai b\bar{e}.i$	When did they give you	
	$t\bar{u} d\bar{a}dand ?$	this news ?	
	$\chi\bar{i}rs Daula$	The bear took up and	
	$Muhammad$	carried off D.M.	
	$a b\bar{a}r s\bar{a}\chi t$		
	$\chi\bar{i}rs dast a p\bar{a} i$	The bear pawed (?) his	
	$\bar{u}-na kand$	arms and legs	

I am unable to assert the existence of the ending -na. I have it recorded only in the forms $\bar{u}na$, $ham\bar{u}na$, $ham\bar{i}na$, where the n may belong to the pronoun, giving the forms $\bar{u}n$, $ham\bar{u}n$, $ham\bar{i}n$, corresponding to the Mn.P. $\bar{a}n$, $ham\bar{a}n$, $ham\bar{i}n$. An accusative ending -na is, however, used in Bakhtiāri with a word ending in a vowel.

(c) The sense of the **Dative**, including "motion to", is ordinarily conveyed by using the preposition ba , but the accusative suffix -a appears sometimes to be employed, with or without the preposition ba :

B. *ba šumâ guft* M. *ba.i šumâ* he said to you
guft

B. *berāder i χatārik kalāna guft* the younger brother
 said to the elder

M. *burd ba dīger jâ.a* he carried him off
 to another place

but it is difficult to assert the identity of the *-a* in *kalāna* and *jâ.a* with the *-a* of the accusative.

(d) **Suffix -k (-uk, ĩk).** A few nouns and adjectives have a suffix in *-k*:

B.M.	<i>amuk</i>	paternal uncle
M.	<i>čūĕik</i>	the young of animal or bird
B.	<i>dastak</i>	small bean
B.	<i>jēwuk</i>	pocket
M.	<i>χāluk</i>	maternal uncle
B.	<i>χetārĕik</i>	small
M.	<i>χertĕik</i>	
B.	<i>maidĕikik</i>	small
M.	<i>mū.ibandak</i>	plait
M.	<i>ninĕik</i>	some kind of relation, paternal aunt ?
M.	<i>pĕčāluk</i>	fringe
M.	<i>pĕšĕik</i>	roll (?)
B.M.	<i>pušuk</i>	cat

Probably also:

B.	<i>gādĕik</i>	ewe
B.M.	<i>lakĕik</i>	finger

(e) As regards the syntactical relation between nouns and adjectives, I have not noted any instance of the adjective preceding the noun which it qualifies.

34. Numerals.

(a) The chief peculiarities are found in M., in which:

The 30's are rendered by 20 + 10, 20 + 11, etc. *bĕst o dah*, *bĕst o yāzdah*, etc.

„ 50's „ „ „ 40 + 10, etc.

The 60's are rendered by three score (plus one, etc.).

sī bīst (o yak), etc.

„ 70's „ „ „ three score plus ten, etc.

„ 80's „ „ „ four score (plus one, etc.).

and „ 90's presumably „ four score plus ten, etc.

This recalls the Kowar system of counting by multiples of 20; *bīšīr* = 20, *jū bīšīr* = 40, *trō.i bīšīr* = 60, and the similar but more extended use of *šil* (score) in Pashtu as an alternative method of reckoning.

(b) The modification of the *u*-vowel of *dū* and *nūh* to *e* in *de*, two, *ne*, nine, is also peculiar to M.

(c) Again, in M. the distributives have an *-ī* suffixed, which I do not remember to have met elsewhere :

čārī čārī bigīr take four of each

35. Verbs.

(a) The ordinary infinitive ending of denominative verbs, in Mn.P. *-īdan* is general in both dialects. In a few cases derived forms so composed take the place of an original verb. Thus :

B.M. *šumārīdan* to count Mn.P. *šumurdan*:*šumār-*

B. *šinawīdan* to hear *šinīdan*:*šinū(y)-*
(older *šīnūdan*,
šinūflan; Gabri
āšnuftmūn)

In the Persian used in Chitral in correspondence such compositions as

tasawwārīdan to imagine, suppose

kunānīdan to cause to be done

are employed.

(b) The causative infinitive termination in both B. and M. is *-āndan*; as usually in O.C.P., against *-ānīdan* in Mn.P.

(c) I have failed to note any forms of the Passive Voice in either B. or M., but they probably exist though not in frequent use.

(d) The 2nd person plural termination in B., *-īn*, is common to Bakhtiārī, Kermānī, and other Persian dialects.

(e) In the case of verbs with distinct present and past bases, the present base is sometimes generalized.

Thus:

B. <i>čīnd</i> : <i>čīn-</i>	} to pluck	Kermāni Persian (<i>wur</i>) <i>čīندان</i>	Mn.P. <i>čīd-</i> : <i>čīn-</i> ;
M. <i>čīnd</i> : <i>čīn-</i>			
B. <i>χēst-</i> : <i>χēz-</i>	} to rise		Mn.P. (<i>bar</i>) <i>χ^vāst-</i> :
M. <i>χīst-</i> : <i>χīz-</i>			(<i>bar</i>) <i>χēz-</i>
B. <i>šīnauwīd-</i> : <i>šīnau-</i>			cf. older <i>šīnuft-</i> : <i>šīnō-</i> and the dialects

(f) The prefix *ni-* of the Mn.P. forms is absent in:

B. <i>šīšt-</i> : <i>šīn-</i>	Mn.P. <i>nišast-</i> :
M. <i>šīšt-</i> (pres. doubtful)	<i>nišīn-</i>
B.M. <i>šānd-</i> : <i>šān-</i>	<i>nišānd-</i> :
	cf. B _χ . <i>šūndan.</i> <i>nišān-</i>

Similarly the *an-* of Mn.P. *andāχtan* is missing in
M. *dāχt-* : *dōz-*, to throw.

(g) The Modern Persian verbal prefix *bar-* is represented, as in most Mn.P. dialects, by *wer-*

B.M. *werdāšt* Mn.P. *bardāšt*

(h) Where the tense and mood prefixes *mē-*, *mī-*, and *bi* are prefixed to a verb beginning with a vowel, elision may take place:

from *īstādan* — B. *mēstum*, M. *mīstam*, I stand; B. *bē.es* (i.e. *bē^es*), M. *bīst*, stand!

36. Prepositions.

The only unfamiliar preposition is the *da* of M., corresponding generally in meaning to Mn.P. *bah*. Perhaps it is a mere distortion of *bah* due to the influence of the Pashtu particle *da* of the genitive and ablative cases.

The M. use of *derūn* as a preposition meaning *in*, *in the midst of*, is not paralleled, at least in O.C.P.

For examples of the use of the various prepositions in B. and M., see below, § 38.

37. Syntax and Idiom.

As regards syntax and general idiom, these dialects do not differ in many points from O.C.P.:

- (a) The present tense is used to denote the future, as generally in O.C.P., and the Mn.P. idiom of the present tense of *χ^vāstan* plus the past base of the principal verb does not appear to be known.
- (b) *χ^vāstan* and *fārīdan*, to want, wish to, and *boiyad bā^ad*, etc., *boi.īst*, must, are followed in both dialects by *ki* and the present subjunctive of the verb.

In M. *boi.īst* also takes the infinitive:

šumâ râ çè mīboi.īst ī kār What necessity was there
râ kerdan ? for you to do this ?

For examples, see s.v. in the Vocabularies.

- (c) *tānistān*, can, be able, is followed in both dialects, as in O.C.P., by the present subjunctive, which in M. may be introduced by *ki*. It can also be accompanied by the infinitive, which in B. appears to precede, and in M. to follow, it, e.g.:

B. *raftan namētānam* I cannot go
M. **na tānistam raftan* I could not go

- (d) The *izāfa ī*, whether between noun and noun or noun and adjective, is occasionally omitted. It is similarly often omitted in other dialects of Persian, usually by elision when it comes into contact with another vowel, but sometimes merely through haste or carelessness of speech.
- (e) My Madaglashtī informant appeared frequently to use the pronouns and verbal forms of the 1st person plural instead of those of the 1st person singular. Possibly he was accustomed to thinking in the plural, and it came natural to him in giving a part of a verb to say "we come", "we go," rather than "I come", "I go". In Bakhtiārī there is often an inaccurate use of the numbers in

the case of verbs in the 3rd person where the subject is not expressed.

EXAMPLES OF PREPOSITIONAL AND ADVERBIAL
EXPRESSIONS

38. The following examples of the use of the principal Prepositions and Adverbs may be found of interest.

N.B.—It should be noted that I have kept strictly within the limits of my scanty material, and have refrained from assuming or creating any words or forms, however probable, of which I have no actual record. Where blanks occur it is, therefore, not to be inferred that the forms do not exist, but only that my hurried inquiries failed to elicit them.

There is, for instance, no reason to believe that B. lacks a means of expressing the preposition "at" or M. the genitive "of thee".

39. The Nature of the B. and M. Vocabularies.

(a) It has already been stated that the bulk of the words in both dialects are pure Persian, and a glance at the Vocabularies which follow will make this obvious. Many of the words have, however, become obsolete in the language as it is now spoken in Persia, but some of them have survived in everyday use in Hindūstānī. Where this is the case it is difficult to determine whether B. and M. have inherited them along with the other words they possess which are still current in the Standard Persian speech of the present day, or whether they have acquired them by borrowing from Hindūstānī and Pashtū.

The following may be cited as examples :

B.M. *aurat* (P.Ar. and H. *aurat*)

B. *čimča* M. *čamča* (Mn.P., H. *čamča*)

B. *kertā* M. *kirta* (Mn.P. *kurta*, H. *kurtā*)

B. $\chi\acute{a}ma\chi\acute{a}$ (Mn.P. $\chi^v\acute{a}hma\chi^v\acute{a}h$ in constant use in Afγ.)

B. *mōza* (Mn.P. *mūza*, H. *mōza*)

B. *nāšpōtī* (Mn.P., H. *nāšpātī*)

B. *qalwa* (Mn.P. *qulba* = plough (Steingass); Afγ. *qulba* = yoke of oxen)

B.M. *rikābī* (Mn.P., H. *rikābī*)

(b) The following are probably direct borrowings from the Indian side :

M. *kōt* (Engl. through Hindūstānī; also known in Persia)

M. *latta* (Panjābī *latthā*)

B. *mānja* M. *manja* (H. *mānjhā*; Panjābī *manjā*)

M. *tāmba* (H. *tāmba*; P. *tāmbā*)

B. *wāskat* (Engl. through Hindūstānī)

Perhaps also *kitta-sag*, cf. Hindūstānī *kuttā*)

(c) Direct borrowings from Pashtū (Afγ.) appear to be scarce :

As above, B. *qalwa* has possibly been drawn from Pashtū.

B. *gādīk* may perhaps be resolved into *gād* + *īk*, in which case it may be derived from Afγ. *gad*, sheep.

M. *tīt* may be identical with Afγ. *tīt*, low, short, stooping down.

M. *tsāder* is identical with the Afγ. form. M. *tsader* may be a mis-writing, otherwise it may be a borrowing of H. and Panjābī *čaddar* under Afγ. influence.

B. *jauwārī*, M. *juwārī* are probably derived from Afγ. *jawār*, but there is also H. and P. *ju.ār*.

(d) Borrowings from or through Kowār are naturally fairly numerous :

B. *āsaqāl*, M. *asaqāl*, a minor district official, is a title used in the Chitral administration "*āsaqāl*" ("*aksakāl*" O'Brien). I believe that it is a Turki word meaning "White Beard" (see J.R.G.S., vol. 1, No. 6, Dec. 1917, p. 411, where it is spelt "*aksakal*").

B. *kâk*, dry, cf. Kowâr *kâk*, dried up.

B. *pārčam*, Ko. *pārčam*, *parčām*.

B. *šālī*, M. *šālī*, Ko. *šālī*.

M. *arqa*, Ko. *arqa*.

M. *tōng*, cf. Ko. *tōng*.

M. *pākūl*, Ko. *pakōl*.

M. *pūč*, Ko. *pūč*.

(e) After discounting all the manifestly Persian words which constitute the bulk of these vocabularies, and, again, those which can be traced to Kowâr, Hindūstānī, or Pashtū, there remain a score or two of words whose origin is obscure to me and to which I can suggest no parallels. They may be regarded as contributing to furnish a *raison d'être* for this article.

(f) There is no reason to suspect borrowings from geographically remote dialects of Modern Persian; where coincidence of form occurs it only argues a greater extension at some period of the word or form than one would have deduced from its isolated occurrence in a single dialect. The following points may be mentioned:

The identity of the vowel of the past base of B. *paχtan* and Gabrī *paχ-ōdmūn*, to cook, in contrast to the *u* generally found in Mn.P. and O.C.P. *puχtan* is of interest.

Again, M. *tambân*, trousers, appears to be the same word as the Gabrī *timbūn*, under-trousers, drawers. There is also H. and P. *tambā*, loose pantaloons.

B.M. *paitauwa* is identical with Bakhtiārī *paitauwa*, putties; the ordinary Persian is *pāpīč*.

B. has *būr*, grey, Bχ. *būr* = chestnut (of a horse).

B. *pas i pā* is duplicated in Bakhtiārī poetry.

B. uses *fan* and Bχ. *fand* = fraud, deceit. *Fand* is given in Steingass's Persian dictionary, but I do not remember hearing it in O.C.P.

Identical with B., *bāng* is Kurdī, *bāng*, roof.

- (g) Both B. and M. differ from most dialects of Mn.P. in presenting few examples of Metathesis. I have *mijâz* for *mizâj* and *juryât* might represent the Turkish word, which I am unable to authenticate, but which is, I think, *juγürt*.

TEXTS

SPECIMENS OF BADAḤŠĀNĪ

I

This text was the result of an attempt to explain the parable of the Prodigal Son to my informant, and get him to give a version of it in BadaḤšānī. He had, however, strong views as to what would naturally occur in such a family crisis; witness the intrusion of the cousin.

Yak ādam dū bača dāšt. χatārīk bača ba pidar i χūdaš guft: "Ēⁱ pīder, īsa i brāder i kalān aloi.id biko; īsa i man ham aloi.id biko."

Birāder i χatārīk kalān a guft ki: "Īsa i tū bīsyār šuda as. Mā o šumā ai yak pīder hastīm, birāber mēgīrīm."

Bača i amukaš āmad o guft ki: "Īsa i mārā χāmaχā bi mā bitè (or χāmaχā bitè'm) kī amuk i mā as."

(Guftan) "Sa^{ar} bī.ā, waχt īsa i tera mētīm".

"Sa^{ar} ham āmadīm ba mā na dādī. Mārā fan zadī. Čera fan mēzanī? Haq i mā bitē."

II

This second version of the same parable represents an attempt to get my informant to render it sentence by sentence, but by this method I had myself first to make a probable rendering and then to try to get it altered or corrected. In these circumstances the result cannot be regarded as the free and natural expression of a BadaḤšānī, though it is, I believe, fairly correct and intelligible.

Yak ādamī dū bača dāšt. Bača i χatārīk ba pidar i χūdaš guft: "Ēⁱ pīder, o haq i χīdam ba man bitī." Ū waχt pīderaš ba dū bača i χūdaš māl i χūdaš taqsīm kad.

Bād raft o χīrs ba sang ki šaχ bē.āram da bālā i bār kūnim. Bād ū ba šaχ mānd wa ī gurēxt.

Daula Muhammad rafta ba kūh ēūčahā i palang ba kuh dīd. Čār ēūča būd. Aqb ters kerda bergašt ba χāna. Da χāna āmad, sanāj girifta. Waxt i āftau nīmruz da hamū tarak rasīda, hamū ēūčahā ra girifta da derūn i sanāj gerdānda as, ser i sanāj basta kerd, ba aqb gašt, nīm i rah āmad.

¹ χušguzerānī = enjoying oneself without regard for consequences. It is hardly as strong as "riotous living".

Palang *χaber šīd, āmad. Āmad ba qišlāq qarīb šīd. Ū ham ba qišlāq rasīda az zīr i qišlāq aqab gašt wāstē i čūčahā's. Āwurd tīt kerd da bām der pīš i Mītaržau i Drōš. Sağahā ba hamūn čūčahā ser dādand. Hēci pīš na šīdan ai būvi zōrāwer.*

Ba unhā Mītaržau īnām kerd, ham čūčahā Mītaržau ba Drōš burd.

The narrator, Shīr Muhammad, was a poor hand at telling a story, and it was difficult to obtain explanations from him. I am not clear about the meaning of parts of the first paragraph :

kat obviously means "along with", but I know nothing about the word.

pēčīdaš. pēčīd suggests "hugging", but the general sense seems to be "set upon". *-aš* probably for *-šān* and apparently ungrammatical.

bār sâxt glossed "carried".

patik glossed "eyelids", but I do not know the word.

Palik is the Kōwār for "eyelid".

χisī probably = *χudaš rā*.

šaχ glossed *taχt i sang*.

būd. Aqb . . . MS. has bād aqb. Ba'd would be more natural than this independent '*aqab*.'

tarak. I do not know whether the word is ترک or طرق nor what it means. There is Bχ. *tarak* = crack, spilt, and here the meaning might possibly be a "cleft" in the rocks.

az zīr . . . čūčahā's. There seems to be some confusion. Presumably it went back because it could not find its cubs. Otherwise omit *aqab*. "It went about on the lower side of the village (looking) for its young."

II

Yak mard būd, Dilarām nom dāšt. Āšiq šīd, guft ki :

Būlbūl ba bāyo raft,

Nazar ber nihālo kat.

- Āhī kašīd, qāmat i Lēlī χīyālo kad.

 Mā dārīm dard i hišq
 Mā bēh' namīšawīm,
 10. Tu badnām mišavī.
 Dīlarām dilberī, Sangil tu kāfirī.
 Āmad nimāz i šām
 Nē-āmad nigār i man
 Yak dāda pā.as dāštam
 15. χāb i man harāmo šīd.
 Dīlarām dilberī, Sangil tu kāfirī.
 Dil hamrā'te mīberī
 χūd yār i mā šawīt.
 Malahim ba kūh, ū dašt ū bīyābān γarībo nīst.
 20. Herjā birasīt, χaima zad o bārigā girift (o) hēc
 γarībo nīst
 Dīlarām dilberī, Sangil tū kāfirī.

This was the only piece of verse which Shīr Muhammad could produce, and his knowledge of it seemed very uncertain. I suppose it to be a garbled form of some popular Persian love-song, and not native to Madaglasht nor even probably to Badakhshān.

The *o*'s and *ū*'s recurring throughout are presumably metrical expedients. They were pronounced as if they were part of the preceding word.

1. 4. *sangil* presumably = *Sang-dil*.
 1. 14. *pā.as* presumably = *pās* of *pās-bān*.
 1. 19. *Malahim* probably for *malā.im*.
γarīb here and in l. 20 perhaps means "out of place".
 1. 20. Is *Dīlarām* or *Sangdil* the subject?
Birasīt probably *birasīd* = *mīrasīd* 3rd sing. imperf.

TRANSLATION OF SPECIMENS

B. I

A man had two sons. The younger son said to his father: "O father, divide off my elder brother's share (of the inheritance), and divide off my share likewise" . . .

The younger brother said to the elder: "Your share has been made too big. You and I are of one father, and we (should) share alike."

The son of his uncle came and said: "You must give me my share, for your father is my uncle." (They said): "Come to-morrow morning and then we shall give you your share" . . .

"I came in the morning" (said the cousin) "but you gave me nothing. You have fooled me. Why do you fool me? Give me my rights."

B. II

A certain man had two sons. The younger said to his father: "O father, give me that which is due to me." Thereupon the father divided his property up between his sons. Some days later the younger son gathered his belongings together and journeyed off to a distant country. There he wasted his substance in riotous living. When he had dissipated the whole of it a severe famine fell on that country and he got into great straits. He went to one of the men of that country and entered into partnership with him, and the man sent him out into the desert to feed his swine, and he was glad to eat the same food that the swine ate, and no one gave him anything.

Then he thought within himself, and said to himself: "How many servants are there in my father's house who receive pay and have more than enough of bread, while I am dying of hunger. Now I will arise and go to my father and say: 'O father, I have sinned against God and against you and I am not worthy to be called your

son, now support me in any fashion as one of your servants.'"

Then he arose and went to his father. Now when he was a long way off his father saw him, and pity came into his heart and he ran and caught him in his arms and kissed him.

M. I

There was a man (by name) Daula Muhammad, and he went to a mountain. He went to the mountain along with another man. Afterwards a bear attacked them. When it attacked them one of the two men escaped. The bear took up the man Daula Muhammad (on its back) and carried him off to another place. Then it proceeded to paw his eyelids and his arms and legs. "He is alive," it said. But Daula Muhammad pretended to be dead.

Then the bear went to a cliff (saying), "I will bring a slab of stone and put it on him (*or* put him on it)." Then while the bear was occupied with the stone the man made his escape.

(Another time) Daula Muhammad went to the mountain and saw a leopard's cubs. There were four cubs. Then he took fright and went back to his house. He came to his house and took a skin-bag (for carrying grain in), and at midday, having returned the same way (?), he caught the cubs and turned them into the bag. Then he tied up the mouth of the bag and turned back.

He had gone half way home when the leopard found out (that its cubs were missing) and came (after him). It came up to near the village. Daula Muhammad, however, had reached the village and (the leopard) went back from below the village (looking) for its cubs.

Daula Muhammad brought them and put them down on the roof in the presence of the Mehtarzhau of Drosh. They set the dogs at the cubs, but they refused to go forward because of the powerful odour.

The Mehtarzhau gave Daula Muhammad a present and took the cubs away to Drosh.

M. II

There was a man, Dilarām by name, who fell in love and said :

The Bulbul went into the garden,

She looked at the trees.

He sighed and thought of the form of (his) Lēli.

Dilarām you are a lover, Stony-Heart you are an infidel.

You carry off my heart with you ;

Be you my lover.

Give no medicine, Physician,

I suffer from the pain of love.

I will not get better, and you will be discredited.

Dilarām you are a lover, Stony-Heart you are an infidel.

Evening prayer-time came,

My lover came not.

I kept one eye on the look out.

Sleep became unlawful to me.

Dilarām you are a lover, Stony-Heart you are an infidel.

You carry away my heart with you.

Be you my lover.

Curses (?) on the mountains and the plains and deserts
are no strange thing.

Wherever she came she pitched her tent and made her
place of audience (*or* her camping-ground),

(And) it is no strange thing.

Dilarām you are a lover, Stony-heart you are an infidel.
