your abilities

Koko an amazing animal

Koko is a gorilla. She lives near Santa Cruz in the USA with her friend and teacher, Dr Penny Patterson. Dr Patterson is a teacher at Stanford University. She is very interested in Koko because Koko has an unusual ability: she understands language. She can't speak, but she can understand instructions and she can use her hands to say things. She can use over 1,000 signs. She remembers people's faces too. Koko likes art and other animals. In one video, we watch Koko as she uses a paintbrush and paints a picture of a bird. In another video, she plays an electric piano.
