

Expectations for the future of EU's dealings with health crises

As proposed by the Czech Republic and Hungary

Layout

- Current Situation
- Objection I
- Objection II
- Summary

Current Situation

- In order to guarantee “normal life” --> 70% of EU needs to be vaccinated – Herd immunity
 - > 313.390.000

Currently available:

- Total doses delivered to EU/EEA countries: 80,620,107
- Total doses administered: 64,911,984

Fully approved vaccines 1.86 Billion doses

- Distribution of vaccine is based on per-capita population
 - 47,02 % allocated to Germany (18,58 %), France (14,99%), Italy (13,45%)
 - 52,98 % shared between 24 other EU member states

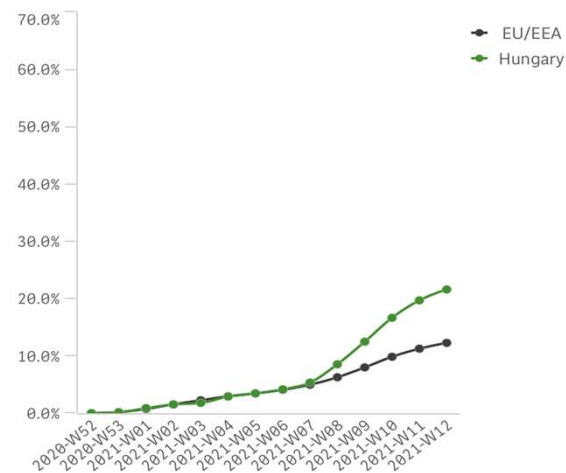

Our Objection I

- DECISION No 1082/2013/EU) and the Annex of 18.06.2021
 - Procurement of any COVID-19 vaccines lies solely within the jurisdiction of the European Union
 - Member countries are to refrain from individual talks with agreed vaccine producer

=> Hungary

Cumulative uptake (%) of the first vaccine dose in EU/EEA countries as of 2021-03-28

by reporting week

Objection II

- EU4Health
 - **REGULATION (EU) 2021/522 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 March 2021**
 - Distributions of needed grants are tied to EU's rule of law compliance
- ⇒ Fallacy
- ⇒ see lawsuit by Poland and Hungary

Summary

- Distribution of vaccines should be tied to number of cases
 - Alternatively open countries up for individual trade talks
 - Adherence to Article 152 in the Amsterdam Treaty Article 129 - EC Treaty
 - The Commission acts as an liaison rather than a executive power
- We support the Proposal of the green certificate if that means the immediate opening of borders
 - Clarification for the differentiation of vaccinated and negative tested?

A Digital Green Certificate is a digital proof that a person has either

- Remove the conditioning of EU4Health grants
