### 1. Course Description

To say that the European Union – with its multi-national, multi-level, hybrid governance structure – is a complex political entity... sounds almost like an understatement. Approaching individual EU integration problems can thus become a daunting task, as EU problems do not exist in a vacuum, but are enmeshed in a thick layer of formal procedures, informal norms and often national and inter-institutional tug-of-war, all of which obscure clear view.

In this course I want to untangle that “mess” of EU governance and show how things “hang together” rather than how they disappear into the procedural jungle. The goals of this course are thus easy/complicated enough: first, the course will briefly cover European integration milestones and institutional framework, second, it will introduce the main policy areas and third, deal with dilemmas of European Union politics! Since this is a course on understanding the EU, the aim is to cover European politics in a way that makes it “closer” to the people – through real-life examples.

To this end, I want to connect textbook chapters with real life examples (via student presentations), institutional legacy with present-day political head-scratchers.

### 2. Student Learning Outcomes

Upon completion of this course, students should be able to:

- Name and briefly describe main policy areas of European Union
- Name the main institutional actors and their competences in given policy areas
- Identify dilemmas of multi-level, multi-national governance and lead an educated discussion about them
- Navigate European Union’s websites, Official Journal of the European Union ...make heads and tails of EU’s network of portals, agencies and representatives
- Skills: teamwork and presentation; policy analysis and recommendations

### 3. Reading Materials:

### 4. Teaching methodology

To cover the main integration areas and dilemmas, the course material is divided into three logical parts:

- Historical and institutional framework, its actors and processes (sessions 1-2)
- Main EU policy areas (sessions 3-9)
- Dilemmas arising out of EU integration (sessions 10-12)
- 13<sup>th</sup> session on May 16<sup>th</sup> to accommodate more students (presentations)

To do it in a way that makes it “closer” to the people, the sessions 3-12 will be conducted in a lecture/seminar format. Lecture part will focus on evolution, actors, rules and aims of a given policy area (or the gist of a dilemma that often lies in the nexus of multiple policies and institutions). I will do my best to illustrate with clear examples. The seminar part will be introduced with a team presentation by three students of a policy-relevant real-life situation.

- Fail: <50

**8. Detailed description of the assignments**

## ♥ Team Presentation

Each session – whether it is an EU policy session (weeks 3-9) or a “dilemma” session (10-12) – aims to untangle the institutional context and illustrate an event with an example, problem from the area on **a real-life case**. For *example*, the session on energy and environment suggests student team presents on the “*Green Deal*” – recent EU pledge and plan to transfer to carbon neutral economy by 2050.

The goal of **team student presentation** is to illustrate a case or event from the policy area covered that day. The closer to reality, the better!

1. Pick a topic and team-mates --> 3 students
2. Consult with me what exactly would the three of you like to cover
3. **Prepare a .ppt to share during class**

### PRESENTATIONS:

- Explain **what** exactly are you presenting [example Green Deal] ...*what is this green deal?*
- **Why** should we care, **how** is it different from the past situation... *how was environment protected until now? What is the big hubbub now?*
- Give us a **brief** overview ...*what are the targets? How long? Is there any budget to spend?*
- Give us some **details** ...*How can it be used? What projects are encouraged? Are there any specific country plans already?*
- What is your opinion? What are the **pros** and **cons**? ...*what good can the green deal bring? What are the pitfalls? What do we need to watch out for?*
- **2-3 questions for class/Teams debate**

**The team presentations should be around 15-20 mins!!**

Don't just read off of slides, tell us what you know 😊

Assessed area	Percentage
Subject: what is covered	2%
Context: why and how is it relevant	3%
Overview	5%
Details	10%
Pros and cons	3%
Questions	3%
<b>TOTAL</b>	<b>26%</b>

## ♥ Quick-quiz

Answer two questions on Moodle following each lecture until Friday. Each question = 1 point/1%.

## ♥ Policy Paper (1200 - 1500 words; excl. references)

Policy paper is a type of document which either evaluates impacts of a policy on a given actor, say a state, region or industry or alternatively calls for a policy to be adopted to resolve an existing problem.

First, the paper needs to identify **what is the problem.**

*Example:* The EU-UK Withdrawal Agreement is negatively affecting UK fishing business!

Second, what is the policy and what is its **impact?**

*Example:* The Withdrawal Agreement (WA) effectively removed UK from both the common market as well as the customs union; while there are no trade tariffs imposed, the UK fishermen and exporters are suddenly faced with a wall of “non-tariff barriers” to trade resulting from EU food health and safety regulations as part of the common agricultural and common fisheries policies. They have to document now, that they comply with the EU rules.

Third, what is **the context?**

*Example:* Based on comparison of January 2020 and January 2021 data – British fish export to EU has dropped by X percent. British fishermen export XY percent of catch to EU common market, specifically X% to France, Y% to Germany and Z% to Poland. The industry employs so and so many workers and generates 0.01% of British GDP. Fishing business is typically medium sized with only a small percentage of companies employing more than 200 workers... As a renegotiation of the WA is not likely in the near future, the fishing industry will be impacted for the foreseeable future.

Fourth, what do you **recommend** to alleviate or resolve that problem? Pros and cons?

*Example:* State support for fishing industry (can we afford it? For how long?). Administrative help by the state (training for clerical workers? How feasible?). Expectations of fishermen moving to a different industry? Can UK help to create any new jobs? Would Conservative government even consider something like this? Can fishermen diversify markets (where? Trying to export fish to Norway is like bringing owls to Athens...). Or just do it and relocate company to EU (as advised by government).

Conclude.

A policy paper is a “practical” paper (not an academic paper) so it does not include theory. This however *does not* mean references are omitted – they point the reader to used data/statistics or legal documents.

Submitted papers will be processed via **Turn It In** originality check software.

To prevent any misunderstanding **PLAGIARISM is defined as:**

*"the unauthorized use or close imitation of the language and thoughts of another author and the representation of them as one's own original work."*

- Random House Unabridged Dictionary, 2<sup>nd</sup> Edition,  
Random House, New York, 1993

Turnitin's White Paper 'The Plagiarism Spectrum'<sup>1</sup> identifies 10 types of plagiarism ordered from most to least severe:

- 1. CLONE:** An act of submitting another's work, word-for-word, as one's own.
- 2. CTRL-C:** A written piece that contains significant portions of text from a single source without alterations.
- 3. FIND-REPLACE:** The act of changing key words and phrases but retaining the essential content of the source in a paper.
- 4. REMIX:** An act of paraphrasing from other sources and making the content fit together seamlessly.
- 5. RECYCLE:** The act of borrowing generously from one's own previous work without citation; to self-plagiarize.
- 6. HYBRID:** The act of combining perfectly cited sources with copied passages—without citation—in one paper.
- 7. MASHUP:** A paper that represents a mix of copied material from several different sources without proper citation.
- 8. 404 ERROR:** A written piece that includes citations to non-existent or inaccurate information about sources
- 9. AGGREGATOR:** The "Aggregator" includes proper citation, but the paper contains almost no original work.
- 10. RE-TWEET:** This paper includes proper citation, but relies too closely on the text's original wording and/or structure.
