

The Louis went to Maine in order to [testify] in support of the Right to repair bill.
Prime minister has mentioned some [severe] issues with the current system during his last press conference.

While slight hardware modifications of the power delivery usually don't [run the risk of] an immediate hardware failure, they might cause some damage in the long run.

The crisis has completely [undermined] everyone's belief in the totalitarian government.

These people are clearly not aware, that spraying alcohol everywhere is a serious fire [hazard].

Pro

-even ~~subtle~~ exposure is dangerous

-people have the right to breath fresh air everywhere

-someone's health shouldn't be endangered by the actions of others

(not sure about subtle: perhaps better might be "short and limited exposure")

Con

-going too far risks loosing scientific credibility

-it is possible to avoid exposure outdoors

-people should instead focus on spreading the ban on indoors smoking

-there is no evidence, that exposure to secondhand smoke outdoors can cause severe health damage

*- good use of vocabulary
- clear points correctly stated from article ...*

Thanks, J -

good+
