good collocation!

good register!

8.1 the idiom was "cut out for" sthng  
= = =  
= to be suitable for sthng / to suit  
e.g. "He isn't cut out for being an administrator. He's too shy and not detail oriented."

but "cut out" according to websters can also mean to become imperative, so I suppose an engine can "cut out"

Patrik,  
Excellent work!
