

It is clear, that many places, objects or even persons are known for their typical features or their spirit. And these typical symbols are not always in a good sense. For example, ~~the~~ smoking in New York City. But in the smoking case, this coin has two sides. We can hear people say "it is bad" as often as they say "there is nothing wrong with smoking".

In my opinion ~~the~~ smoking does not bring anything good for humans. Yes, it is a free decision of anyone to start smoking. But their free will affects all people in their surroundings. Honestly I hate the smell of cigarette and if your nose catches the smell once it will not lose it.

In addition, the cigarette smell is very intensive and you can still smell it even though the smoker has already stopped to chain smoke. The smell is even worse than smoke itself. For example, a man has a quick cigarette before he gets on the bus. The smell is still in his lungs, on his hands, his clothes is soaked with disgusting odour. And it takes just a few minutes and the bus is full of this odour and this is nothing comfortable.

Moreover people who smoke are often inconsiderate to other people. I have to admit this is not a rule. But often they do not take care of the fact, that many people cannot stand the smell of cigarette. For example, If they are gently ask by someone to stop smoking, their answer is "Not my business, you should find another place to stay". Also, they automatically start to smoke in the restaurant's garden, when they buy a beer or a coffee. But there are people sitting around them who would like to have their meal on the fresh air. Unfortunately they cannot.

To sum up, I am anti-smoker as much as I can. But I can be permissive to smokers, who take care of their surroundings. But I can see this in rare cases. More people even do not know that they can annoy another people with their smoking. And this is the reason I would be for the banding law in public places.

better:
"in the
case of smoking"

stop doing sth
"cease an activity"

/to/ prep /

/ no comma
before a
"that"
clause

/you present /
The argument here
is one of "consideration"
for those you live around,
and it is well-presented +
well-developed...
Good work!
